

7 Inch Rugged Android Tablet PC Designed and Built to be Tough

Over the course of years, tablet PCs have started to become a more important part of our daily life, for leisure and for professional use. Plus thanks to an extensive range of apps, tablet PCs can assist us in a variety of situations. But until now, these tablets used to be very fragile and were not designed to be operated in the harsh outdoor environment and that is why Chinavasion is proud to introduce its first fully [rugged Android Tablet](#).

Housed in a fully rugged outer skin, Rose Li, PR Manager for Chinavasion says the Strike Tablet can withstand shocks, drops, spills and even immersion into water. “Ready for all extreme conditions, this 7 inch Tablet PC is both suitable for professional users who need a strong and reliable tablet PC when operating in the field and for personal users who require their tablet to go just that step further says Li.

Rose Li continues “For the 7 inch screen, tempered Gorilla Glass 2 was used to protect the screen from shattering on impact and even scratches will be hard to inflict on the screen.” Much more resistant to the abuses of operating under extreme conditions, the Strike offers an alternative to the rugged phone or laptops.

“To stay connected everywhere you go, the rugged Strike tablet can wirelessly connect to the internet using the 3G network or Wi-Fi and even allows you to make phone calls directly from the tablet.” Rose Li continues “As we know how important connectivity is, the Strike could not stay behind and offers you different possibilities to stay connected always and everywhere.”

On top of all of this, two cameras are built into this ruggedized tablet and will make it easy to take pictures or record videos says Li and continues “A detachable hand strap will let you comfortably hold the tablet in one hand and give you a firm grip on it.”

This truly revolutionary Android tablet PC can be purchased today at an extremely competitive wholesale price and will make working outdoors much easier says Rose Li and finishes with “Our dedicated sourcing team works together closely with our QC engineers to find the best products at the best prices.”

Chinavasion is a Hong Kong and China based wholesaler specializing in [Android tablets](#). For more information and pricing on all their products, see <http://www.chinavasion.com>.
