

Triple Creek and Skillsoft PARTNERSHIP FAQ

The most effective learning solutions blend together hands-on experience, support from knowledgeable advisors, and a range of learning resources that could include formal courses, informal videos or job aids, or social knowledge assets, all of which are aligned and measured against business outcomes and competencies. For these reasons, Triple Creek, a leading social learning software company, and Skillsoft, a learning solutions provider, have formed a partnership that

brings together all the pieces of a deep learning experience into an integrated solution.

Why Triple Creek and Skillsoft?

Triple Creek's River social learning platform helps organizations expand meaningful learning through competency-centered learning engagements that have structure and goals connected to them. Employees, managers and administrators can form learning engagements around topics

that impact day-to-day work, productivity, training support and more. Skillsoft provides extensive learning libraries including a wide range of trusted informal and formal learning resources supported by the Skillport platform. The combined result? An engaging and trusted learning experience that includes mentoring and coaching, leadership development, management or professional skills training, and performance support—all organized around the specific competencies and desired engagements of your organization.

The screenshot displays the RIVER social learning platform interface. At the top, there's a navigation bar with 'Home', 'Support', 'My Account', and 'Logout'. Below that is a search bar and a row of icons for 'post', 'review', 'question', 'event', 'to-do', and 'poll'. The main content area is titled 'Recent Interactions' and features a 'RESOURCE REVIEW BY: YOU' entry for 'Best Practices for Marketing New Applications'. A red box highlights 'Recommended Skillport Content' with a red arrow pointing to a 'Recommended Resources' sidebar. The sidebar lists resources like 'Marketing Management for the Hospitality Industry: A Strategic Approach', 'Making Marketing Happen: How Great Companies Make Strategic Marketing Planning Work for Them', and 'Strategic Marketing: Planning and Control, Second Edition'. Below the sidebar is an 'Engagement Participants' section showing the owner and other participants.

How might a user experience the combined solution?

Through integration, the River and Skillport platforms serve up the learning resources from Skillport that are relevant to your learning needs within River. For example, you might see options for a 3-minute video on marketing strategies, or a 7-minute video simulation on providing effective feedback, or a job aid related to leadership skills. All of the relevant resources from Skillport are pulled into River based on your competency selections and the conversations taking place within River (see example screen at left).

Pertinent learning resources from Skillport appear in River within the context of each individual learning engagement to provide authoritative content that participants can share and discuss to extend their understanding of the topic.

How can I get this solution?

Skillsoft can work with you to provide the Learning Library that best meets your learning and business goals. Triple Creek will support your River implementation and the integration of the platform with the Skillsoft learning resources.
