

# Have we met?

They started planning for me in 2009, and I was born in 2013. As for my big family—my materials are rescued from Las Vegas restaurants, bars, homes, events and casinos, dismissed by some as used-up of all worth. But once in my artisans' hands, they gain new purpose. Crafted by hand using a cold method, which has a smaller carbon footprint than the usual hot (toxic) method, my bottles become beautiful and functional works of art. Even barrels, cork tops, boxes, pallets and packing materials sent to my plant are repurposed for retail items or as product shelving. Finally, I generate jobs and show love to the environment. So from the inside-out, my goods are ones that planet earth and its biggest fans are pretty hot about.

*I come from a big family.*
