

## **Thinkful Partners with MasterStreet on Software Development Classes**

*Discover and register for Thinkful's classes on MasterStreet, including iOS, Python, and Ruby on Rails*

NEW YORK, NY - January 15, 2013 - MasterStreet and Thinkful are happy to announce a new partnership that will make Thinkful's software development classes available through MasterStreet's free search engine and booking platform for technology, business, and design classes and training.

Thinkful is an innovative provider of online courses covering iOS, front-end development, Python, and Ruby on Rails. A convenient option for busy professionals, Thinkful classes are offered entirely online and the majority of students take Thinkful classes while working full-time. Students learn at their own pace, and can access the course material from anywhere in the world. Thinkful mentors coach students in weekly one-on-one sessions and daily office hours. Mentors are available for feedback and support via the community discussion board.

"At Thinkful, we're building a school that trains the workforce in the technology skills necessary to sustain innovation and growth in the economy. We have developed a method of online teaching that emphasizes practical, sustainable skills and prepares students to achieve their career goals," noted Darrell Silver, CEO at Thinkful "Our partnership with MasterStreet helps us introduce our innovative classes to the next generation of technology professionals."

"MasterStreet is happy to partner with Thinkful. We have been impressed with the innovative approach that their team is taking to rethink software and web development training, and they share our commitment to meeting the skill needs of the best professionals," said MasterStreet CEO Thomas Lehrman. "Their online classes, covering iOS, Python, Ruby on Rails, and more, provide convenient and valuable learning opportunities for professionals seeking to develop skills and career opportunities as software and web developers."

The following classes, taught by Thinkful's experienced instructors, are currently available:

- Front-End Web Development
- Ruby on Rails
- Programming in Python
- iOS Development
