AvaLAN Wireless Receives ISO 9001:2008 Certification

Huntsville, AL., December 27th, 2013 – AvaLAN Wireless Systems, Inc. receives their ISO 9001:2008 Certification. In addition to AvaLAN's ten years of exceeding customers' expectations, they have recently added this internationally recognized certification to their credentials. To achieve certification as an ISO 9001:2008 certified company, AvaLAN Wireless performed a detailed and comprehensive review and enhancement of its quality processes. This was followed by a successful audit with an ANAB accredited 3rd party registrar. These activities included the development and documentation of a quality management system, regular internal audits, management reviews and the elimination of all non-conformances through documented and verified corrective actions. This certification in conjunction with the supplier quality award we were given by Daktronics Inc. earlier this year proves that AvaLAN continues to deliver top quality products and services.

"It is our Quality Policy that we deliver on the basis of an effective quality system the best products and services that exceed our customers' requirements and expectations. All executives and employees of AvaLAN Wireless Systems are making continuous efforts to achieve the very best quality in all our products and services we offer" said Matt Nelson, CEO of AvaLAN Wireless Systems, Inc.

ISO 9001:2008 provides a tried and tested framework for continual improvement and taking a systematic approach to managing the organization's processes so that they consistently turn out product that satisfies customers' expectations. ISO 9001 is used in some 176 countries by businesses and organizations large and small, in public and private sectors, by manufacturers and service providers, in all sectors of activity.

About AvaLAN Wireless Systems, Inc.
AvaLAN Wireless is an industry leading developer and manufacturer of long range industrial wireless radios and cryptographic technology. AvaLAN's products are designed to enable affordable secure wireless connections in perimeter or remote locations that require long range, interference immunity, superior reliability and uncompromising data security. AvaLAN has grown each year since 2004 and has shipped over 50,000 radios to the networking, surveillance, digital signage, robotics, industrial automation and access control markets. Specializing in Cellular and the unlicensed 900MHz, 2.4GHz and 5.8GHz radio bands, AvaLAN offers a family of encrypted wireless Ethernet and data communications products. We believe our "Secure Products for a Connected Planet" offer unmatched price-performance values and are proudly engineered, supported and made in the USA and Canada.
