Language Scientific is the translation and localization partner of choice for more than 1,000 clients in a range of industries, from Fortune 500 corporations to innovative start-ups.

“Translation services are of critical importance to our global clinical trial operations. Language Scientific provides trusted service time and again, thanks to its unmatched expertise and penchant for quality.”

VP Clinical Operations
Fortune 500 Pharmaceutical Company

Reinterpreting the business of technical translation and localization.

In today's global marketplace, effective translation and localization of medical, technical and scientific content are strategic success factors. Yet organizations often find dealing with translation firms frustrating, inefficient, and fraught with costly delays, errors and, ironically, miscommunications – especially when those firms are based overseas.

At US-based Language Scientific, we do business a different way. We bring care and commitment to every language project, large or small.

For more than 20 years, we've provided medical, technical and scientific organizations with customized translation and localization solutions that make life easier, meeting language needs with:

- » **Exceptional quality** ensured by the industry-leading expertise of our people, our certified quality processes—including our proprietary Nexus knowledge matching—and our advanced applied technology.
- » **On-time, on-budget delivery** with no excuses and no “gotcha” pricing surprises.
- » **Superior service** with a single point of contact based in the US, ensuring clear and responsive communication from an actual human dedicated to your account.
- » **Relentless innovation**, continually improving our processes and technology to deliver best-in-class services quickly and cost-effectively.

At Language Scientific, we are completely focused on medical, technical and scientific content, combining that focus with a single-minded dedication to client satisfaction. The result is a translation or localization experience that is worlds apart from the norm.

The knowledge advantage

To meet the specialized needs of medical, technical and scientific organizations, Language Scientific offers a unique combination of advantages to secure optimal results – every time.

Advanced People

Our exclusive Advanced Scientific Knowledge Network (ASKnetwork™) includes more than 5,000 native-speaking experts from around the world with advanced degrees and work experience in a range of disciplines—from healthcare and life sciences to chemical, electrical and computer engineering. Their real-world expertise ensures reliable, accurate, fluent and culturally appropriate content.

Our proprietary Nexus knowledge matching assigns the optimal expertise for your project. We go beyond general domain understanding, precisely matching your job to the professional with the right experience and knowledge to ensure the best result for your target audience.

Our US-based Project Managers serve as your 24/7 point of contact, managing every aspect of your project, from scheduling and quality assurance to language asset updating. Language Scientific Project Managers have advanced degrees and hold Project Management Professional (PMP®) certifications.

Certified Processes

Our ISO 9001, EN 15038 and ASTM-F2575-06 quality processes include a minimum three-step validation system to certify accuracy and integrity. Multiple sets of eyes—including qualified translators, editors and proofreaders—review all content.

Our workflow management process monitors projects so that nothing falls between the cracks. Your Project Manager takes personal responsibility for ensuring all quality checks are performed according to ISO, EN and ASTM standards, including escalation procedures for rapid issue resolution.

“The Language Scientific specialists have nailed the translation formula: high quality, efficient, knowledgeable and very customer-focused.”

Director of International Marketing, Fortune 500 Aerospace Company

Applied Technology

Our proprietary Language Asset Management System (LAMS) enables us to efficiently manage the quality, visibility and cost-effectiveness of your project at every stage:

- » Project Initiation and Tracking
- » Translation Asset Management
- » Enterprise Document Review Collaboration
- » Financial Reporting

Translation Memory technology reduces cost by enabling intelligent re-use of translated content in context to streamline translation.

Advanced proofreading technology assists human proofreaders, accelerating this critical quality process.

Post-Editing Machine Translation (PEMT) provides the human touch to computer-generated translations to ensure they are understandable, stylistically appropriate and polished.

Natural Language Processing technology, developed by Language Scientific, optimizes content to significantly reduce the cost and time required to complete large translation projects without compromising quality.

Our custom software development capabilities enable us to create technology solutions to address specialized client needs.

A spectrum of solutions

Language Scientific provides a wide range of services to support your strategic global communication goals. We work closely with you to tailor a solution to meet your needs.

Translation

We provide expert translation of medical, technical and scientific content for more than 100 languages.

Software Localization

Working closely with your development team, we help adapt your software, web and e-learning applications to help ensure acceptance in Asia, Europe, Latin America and the Middle East.

Website Translation

We help make your website accessible, usable and culturally acceptable to virtually any target audience worldwide.

Multimedia Localization

We offer comprehensive production services for creating high-quality, multilingual video, film and streaming media content, including voice-overs and subtitles.

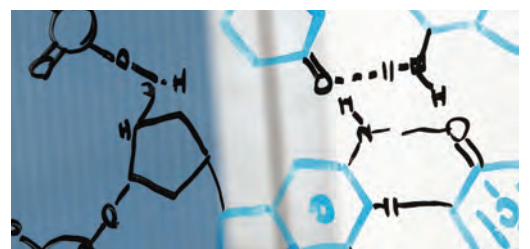

Interpreting

Our expert interpreters can provide clear, accurate oral translation for face-to-face meetings, conferences, escorted events and over the phone.

Natural Language Processing Software Solutions

We provide custom natural language processing software that can significantly reduce your content translation cost and turnaround time, while improving understanding.

Industry focus

Language Scientific provides industry-specific solutions for a diverse range of medical, technical and scientific industries.
