

If you are the one who is ignoring ICD-10, then you're likely not alone. Just don't take any comfort in the company of laggards.

ICD-10 is big; it's an unfunded mandate that will slow you down and will change how you practice ultimately a potential loss in productivity, delays in reimbursement, and increase in claims denials that affects practice revenue.

*A recent survey reveals that “One-third of the practices have not even started preparing for ICD-10”, that’s scary right?*

The date established by CMS for converting to the new codes is October 1, 2014. While the deadline seems far, it is not too early to start learning about ICD-10 and planning for the transition. The sooner you begin, the more comfortable you will be with the now-unfamiliar diagnosis codes when the switch occurs.

## About Us

iPatientCare, Inc. is a privately held medical informatics company based at Woodbridge, New Jersey.
