

## SPIDERSUITE TO SUPPORT MORE INSPECTION REQUIREMENTS

- *Expanded platform supports additional Fannie Mae, HUD and MBA commercial property inspection requirements*
- *New features available to existing customers at no cost*

**Minneapolis (Feb. 4, 2014):** Minneapolis-based SpiderSuite, a leading provider of cloud and mobile inspection management solutions for the commercial real estate industry, announced today that it has expanded its inspection software to support prominent property inspection requirements that commercial lenders, servicers and inspection firms typically require. Specifically, SpiderSuite will now support the requirements for Fannie Mae 4260 and 4262, HUD 9822 and the recently released 2013 MBA property inspection form.

SpiderSuite is committed to providing superior service while significantly reducing operational costs for the commercial inspection industry. With this expansion, the company will enable customers manage their entire inspection portfolio on the SpiderSuite platform, regardless of who their clients are and what forms they are required to complete.

“This release will allow more customers to experience the benefits of having a complete inspection management solution, including cloud workflow, mobile support on any device, and servicing software integration,” said SpiderSuite co-founder Mike Linton. “We are pleased to be able to meet the needs of our customers by helping them manage an even broader set of inspection requirements with SpiderSuite.”

The following features are now available through SpiderSuite and will be offered to existing clients at no additional cost:

- Complete form support for Fannie Mae 4260/2, HUD 9822 and 2013 MBA;
- Support for both MBA and Fannie Mae rating scales;
- Customized logos, file naming, and sections (tabs) for specific client needs; and
- Ability to leverage data across all inspection types for analytics and billing.

### **About SpiderSuite**

SpiderSuite, LLC, is a provider of inspection management solutions for the commercial real estate industry. The company was founded in Minneapolis in 2012 with the goal of dramatically improving the way that inspections were managed between lenders, servicers, inspection firms, and field inspectors. Today, SpiderSuite has significantly reduced customers' operational and processing costs and on-site time, and has given customers of all sizes the power and flexibility of an enterprise-level inspection platform.
