

TRAPP ONLINE LAUNCHES COLOCATION SERVICES AT NEXTFORT DATA CENTER

Access to Trapp Connect blended bandwidth Internet a plus for colocation customers

Scottsdale, AZ. – September 18, 2013 – Scottsdale-based Trapp Online, LLC, traponline.com, a provider of industry-specific hosting solutions, is proud to announce that it is now offering IT colocation services and infrastructure at the NextFort modular data center, a strategic partner in Chandler, Arizona. Companies looking to secure their IT will be able to procure not only the colocation basics of rack space, power and cooling but also ultra-secure blended bandwidth Internet and IT consulting services provided by Trapp Online's sister companies, Trapp Connect and Trapp Tech.

"I don't know of anywhere else you can gain access to colocation services in a modular data center and blended bandwidth Internet backed by a phenomenal technical crew all from a single provider," said David Trapp, CEO, Trapp Online. "The team who also built the advanced Trapp Online cloud and Trapp Connect ISP bring an incredible level of IT experience and skill to colocation customers."

Trapp Online adds advanced colocation infrastructure and services to NextFort's data center with the advantages of direct access to the Trapp Connect blended bandwidth ISP and Trapp Tech's managed IT services and consulting. Fast, reliable, and redundant service from Trapp Connect gives business customers the flexibility to withstand carrier outages or performance problems by automatically adapting to changes in the Internet.

"NextFort is out in front with data center innovation," stated Cody Engilman, Director of Sales and Marketing, Trapp Connect. "As a provider of next generation colocation services, Trapp Online will add measurably to their technical leadership."

Through their strategic partnership Trapp Online gains access to NextFort's customers while NextFort gains new services to attract business to its Chandler data center. The two companies will jointly market Trapp Online's colocation services to prospects and existing customers.

About NextFort

NextFort is the owner and operator of a first-of-its-kind modular data center located in Chandler, Arizona. Focused on the design, construction and operation of energy efficient, highly modular, and ultra secure data centers, NextFort has created an innovative design which facilitates the deployment by customers of modern, high-density computing infrastructure services such as cloud computing.
