

Visualize your case.

Ntrepid Timestream, Timestream Capture and Timestream Connect are a suite of productivity tools that help you build complex stories on a timeline, import supporting evidence, and present your case.

 Collect evidence

Feature-rich, yet simple to use, *Timestream Capture* is an intuitive app that transforms your iPhone or iPod Touch into an evidence collection tool. Use it in the field to gather photos, videos and more, then wirelessly transmit your files directly into your Timestream case.

 Visualize the story

Ntrepid Timestream lets you organize and visualize your case on an interactive timeline. Drag collected evidence into Timestream. Files are forensically hashed, establishing verifiable authenticity and digital chain of custody. Export your data into reports or web-based presentations.

 Collaborate seamlessly

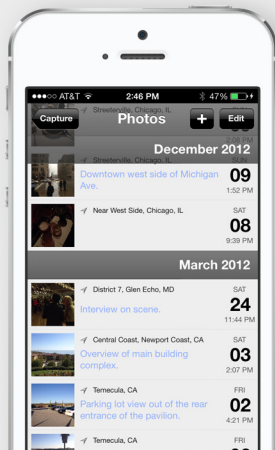

Designed to break down collaboration barriers, *Timestream Connect* enables teams to work together seamlessly on complex cases. Easily share case updates and new evidence. Resolve conflicts and review the complete case history, online or offline.

It's not just a timeline. It's your whole case.

Every case and investigation is a story,

but building a compelling story can be labor intensive and challenging.

Our goal is to revolutionize the storytelling process through intuitive, streamlined tools.

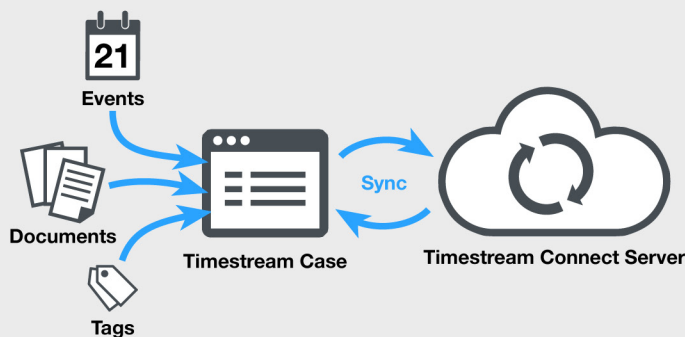

Timestream Capture mobile app

- Record video on-scene.
- Take high-quality photographs.
- Record audio interviews.
- Import scanned documents.
- Add notes to captured evidence.
- Evidence is stored separately from personal data.
- Files are forensically hashed at point of capture.
- Location data is recorded at point of capture.
- Upload evidence directly into your case.

Ntrepid Timestream desktop app

- Organize and visualize your case on an interactive timeline.
- Intuitive drag and drop, tagging and more.
- Time zone support enables international collaboration.
- Export your timeline data into presentations and reports.
- No installation, Mac and Windows compatible.

Timestream Connect server

- Manage cases directly from Timestream.
- Work offline and synchronize on your time.
- Deploy in the Cloud or on-premises.
- Web-based configuration ensures easy setup.
