Iris Data Services Announces ARC for Advanced Control of Relativity
Document Review Technology Company Offers Private Relativity Environment for Low Monthly Fee

NEW YORK, February 3, 2014 — Iris Data Services, a leading provider of discovery solutions, announced today that it has developed **Iris ARC** – a private, fully secure, client-specific Relativity environment for a fixed, low-cost monthly fee. **Iris ARC** is a complete, managed services instance of kCura's e-discovery platform without the upfront investment of licensing the software or purchasing additional hardware and systems. Iris Data Services is a leading supplier of discovery solutions including electronic discovery, managed litigation services and document review technologies, including kCura's Relativity, which includes Relativity Analytics and Relativity Assisted Review.

With **Iris ARC**, the client's instance of Relativity — which includes unlimited Analytics and Assisted Review— resides in Iris' fully secure, SSAE 16/ISO 27001 certified data centers and is supported by Iris' managed services program, **Iris Discovery Management**. **Iris ARC** provides the client complete administrative control of their users and workspaces through the **Iris ARC** dashboard — clients are able to manage users, groups, matters, workspaces, and all permissions from a single interface to Relativity.

"Iris ARC is a revolutionary way for a law firm to use kCura's e-discovery platform, Relativity, without the upfront spend on software licensing and computer hardware," said Major Baisden, president of Iris Data Services. "For as little as $3,000 per month, a legal team can have their own, private Relativity environment with multiple unique workspaces and unlimited use of Relativity Analytics. And **Iris ARC** gives them complete control over their environment through the **Iris ARC** dashboard, a simple interface to complete tasks like setting up users or matter workspaces."

About Iris Discovery Management
Iris Discovery Management (DM) is a managed services platform for law firms and corporations who are dissatisfied with the internal capital and overhead expense or the continual investment and time spent outsourcing discovery needs. **Iris Discovery Management** blends best of breed solutions and technical expertise with the ability for litigation departments to evaluate current electronic discovery spend, ultimately increasing their client serving abilities. Unlike outsourcing every discovery service or paying higher capital investment to keep it internal, Iris has assembled a subscription-based package that includes dedicated applications & infrastructure, discovery consulting, forensics collection & culling, eDiscovery processing, data hosting using kCura's Relativity, data analytics, and attorney document review..

About Iris
Iris Data Services is a leading supplier of discovery solutions including electronic discovery & disclosure, managed litigation services, and document review technologies. Lead by recognized experts in electronic discovery and document review, Iris continually strives to defensibly reduce the amount of reviewable data on every matter. As a Premium Hosting Partner and Certified Reseller of Relativity by kCura, Iris' extensive document

review expertise includes complex search consulting, computer-aided review technologies, and experienced attorney review teams. Iris' discovery experts, project management team, and use of technology have combined to make it one of the fastest growing companies in the industry. In 2011, Iris Data Services made the Inc. 500 list of the fastest–growing private companies in America, making Iris the fastest growing eDiscovery company in the United States. Iris' U.S. headquarters is in Kansas City and its European headquarters is in London. Iris maintains offices throughout the United States, Europe, India and Asia.
