Equipment Management is a Snap with SnapSite™

iPad® Tablet App makes viewing remote equipment information easy.

The SnapSite tablet app automatically finds assets that are close together, displays them as a site, and puts it all at your fingertips. Drill down on specific equipment to see health, maintenance and utilization information that will transform the way you do your job for the better.
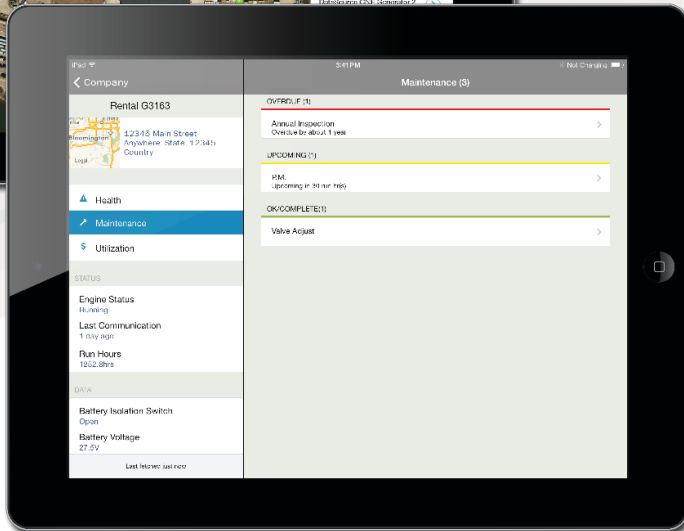

Features include:

▶ Automatic intelligent grouping of equipment into a site.

▶ Quickly switch between health, maintenance and utilization views:
  - Equipment health alerts
  - Upcoming and overdue maintenance alerts
  - Underutilization and overutilization indicators for all your job sites

▶ Drill down to see the details on any piece of equipment
