## About Step One Grievance

Union Built PC, in partnership with Step One Business Services, is now offering a new product in the Grievance and Arbitration Management space. In addition to Union Built PC's highly successful Grievance Manager Application, we will now offer a more cost-effective, lighter alternative called Step One Grievance.

Step One Grievance is designed for Locals with 1000 members or less so these smaller organizations do not have to pay for functionality and flexibility they do not need.

Cloud-based and secure, for all PC types, laptops, tablets and smartphones, Step One Grievance SaaS (software as a service) is billed as a monthly subscription with fees beginning at \$49/month inclusive of setup and consultation.

## Step One Mobile

Step One Grievance features an accompanying smart phone web application as a companion to the full-featured Software. Union representatives can use the easy-touch mobile app to quickly search their grievance database to find a record with full detail and contact information.

## Step One Grievance vs. Grievance Manager

## About Union Built PC

After dozens of years of working in the labor field as members, officers, and activists, we started Union Built PC in 2001 to meet the need for a computer company, that focused on International and Local Unions and their affiliated organizations.

We found a deep need for a company that would deal fairly with labor, offering the kind of relationship that we knew was possible: a mutually beneficial one that would last decades. We also wanted to make our company fully unionized, from top to bottom. We have achieved all of that and more. We have very creative and innovative staff, certified and experienced techs, professional trainers, and skilled assemblers. And they're all union members.
