

Snap 7 Solutions Brief

Solutions Brief
Intel® Developer Zone

Enabled by Intel® Atom™ Tablets for Windows* 8.1

Tablet users can now create the perfect visual expression with the Snap 7 app by Ashampoo. Optimized for Intel® Atom™ tablets for Windows* 8.1, Snap 7 enables tablet users to snap, customize, annotate and share screen shots directly from mobile devices. Through its simple interface, this powerful app offers a simple way for users to create screen shots for any purpose.

Features of Snap 7 app:

- **Capture:** Users can capture images on the screen from static pictures or video.
- **Customize:** Large selection of tools allows users to add notes, symbols or to highlight specific areas of the shot.
- **Share:** Enables users to save photos in common picture formats and easily upload to social media sites or email to friends or colleagues.

Users Create Custom Screen Shots with Snap 7 by Ashampoo

The uses for customized screen shots are nearly endless. They can be used for training purposes, business collaboration and visual self-expression. Now, users can capture, customize and share their perfect screen shots directly on their Windows* 8.1 devices with the Snap 7 app by Ashampoo.

Snap 7 App features:

Custom Capturing

Users can capture screen images from static photos and graphics or video. Timer feature enables users to capture shots from different intervals.

Customizing

Wide array of customization settings allow users to add notes, include symbols, highlight areas within the screen shot and draw in free form over the shot.

Sharing

Screen shots can be saved as common photo files and then emailed to friends or colleagues. Or, they can be directly uploaded to social media sites.

Simple User Interface

Easy-to-use interface is visually intuitive and touch-responsive. 1-click editing ensures efficiency, and smart background versioning ensures all changes are editable.

More Creative Freedom

Users can create the most creative shots with free form capturing and drawing.

Snap 7 App Powered by Intel

Tablet users can now design and share custom screen shots for a variety of educational, collaborative or personal uses. The Intel® Atom™ processors, full HD high-resolution displays and interactive touch capabilities of new Windows* 8.1 tablets make them ideal for working with this new app.
