

Sally Ride Science Site Licenses

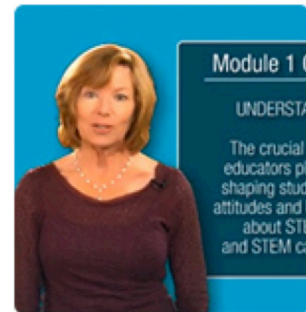

Equip **ALL educators** in a school with professional development and training.

Engage **ALL students** in a school with Sally Ride eBooks, and hands-on classroom Activity Guides for teachers and students that make teaching STEM topics easier for educators and more fun for students.

Create **connections to careers** for students, and fulfill requirements for **Common Core, Next Generation**, and other state standards—all for pennies per student.

Professional Development

It all starts with professional development. When educators (teachers, counselors, administrators) access Sally Ride Online Academy PD programs, such as “Igniting Student Interest in STEM,” they learn new skills, and also how to use Sally Ride eBooks and Activity Guides to their greatest effect.

These programs show how to keep students engaged in STEM by making connections to STEM careers—and to diverse role models who can help students picture themselves as successful STEM professionals. (Blended training options are available.)

eBooks

Sally Ride eBooks on the Kno Book platform are far more than digitized textbooks: they are customizable resources loaded with multimedia resources and links, functionality like flashcards and social sharing, notepads, and more.

Students and educators can access complete collections of Sally Ride Science eBooks in our *Key Concepts in Science* and *Cool Careers* series. The content is aligned to Common Core, TEKS, and other state standards. These eBooks (on the Kno Book platform) provide a personalized multimedia learning experience, and work on PCs, Macs, tablets, and any browser-enabled device.

Activity Guides

Detailed guides for teachers associated with each eBook title available to their students and themselves, filled with engaging hands-on activities for small groups, as well as for the whole class.

Among other benefits, these Activity Guides can help students “think like a scientist” and improve analytical thinking, as well as show educators the eBook content and classroom activities that can support Common Core and other state standards.

Support

The Faculty and Training staff at Sally Ride Science will always be there for you, offering everything from implementation support for a site license deployment across a district to offering detailed help to a single educator on maximizing how they’re using the Activity Guides.

For details on pricing, or more information, call 800-561-5161.
