TESTIMONIALS

Frank I may or may not have mentioned in the past that Ben attends a school strictly for children with autism of about 150 students(not positive on this number yet) and I hear elopement is an issue of concern for all students yet Ben is the only one who has an actual tracking unit, I will be joining the PTA and pushing to staff, parents and guardians the concept of your unit, we live in a very large community and the hopes are for a snowball effect and others pass the word on of the device, we are from Minnesota originally and still have active connections/conversations in the autism community there and will push the unit to anyone with an open ear. It's a unit that works as stated and at this point has proven itself to us so we have belief in it. I did mention to you that the local sheriff's office would like us to give a brief demo on the unit as they are interested in it as an alternative to what they use in elopement situations. My wife and I thank you and your team

Anthony G. (USA)

It's been fantastic! I was on the beach down in Surf City, NC (right on the beach) from Saturday-Wednesday, had one bar of service and was still able to get all of my activity notifications, SOS panic, etc. It got a little sandy, because I threw it into my beach bag and forgot about it until it gave me a tester notification. I heard it going off, had to dig in the dark bag for the black watch, found it, acknowledged it, etc.

When I got into the office this morning, I set up the geo-fence and tested it at lunch. When I left the area, it went off like it was supposed to, and when I got back into the area, it went off again. Went off, as in, I got text notifications.

I didn't go into the water with it, because it's loose on my wrist and didn't want to risk it getting into the bottom of the Atlantic Ocean. We tossed it around on the sand, upstairs in the house, out on the deck, etc. Every single time we tossed it, opened it, closed it, and pressed the SOS, I got an alert! Did take it out of emergency mode, and updated it for every 60 minutes.

So far, we're very happy campers :)

Erin H. – SmartHomes North Carolina

"The TRiLOC has performed above my expectations. Having used a GPS bracelet by another manufacturer, the TRiLOC is the GPS bracelet I trust for my loved one. I'm still amazed at the tracking accuracy even after 2 months of use. The web-interface is user friendly and easy to change alert settings."

Hey Frank...

This thing is awesome!! Nice job on it.

The web interface is great, I like we can set up the geo fence and turn it on and off. The locator works right on! I can see her walk down the driveway to get the newspaper. The last one, we had absolutely no control, and had alerts and calls all day and night no matter what.

This is EXACTLY what we needed and wanted.

Mike D.

My son uses this ILOC GPS watch I think it is an amazing, Device for our Children and adults it really gives my husband and I piece of mind that this will help keep our son a little safer.

Kimberley M.

"This device is the only thing that gives my family and I peace of mind. This is the 2nd GPS watch we have used. The previous one was from a different manufacturer and it did not allow us to have peace of mind because it was not always functioning. This watch is awesome!! I can sleep at night knowing that I will get a t...ext if my mother breaks her Geo Fence. I always know I will be able to find her by looking at the application on my iPhone. Thank you so much for this great product. Unfortunately, I have a mother with Alzheimer's who loves to walk. This was the only product that allows me to rest easy - if it was not for this product my mother would have to be in a nursing home. Now Mom can stay in the comfort of her own home, with an aid, and have the ability to find her in a moment's notice."

Michelle D. (U.S.A.)

Thank you because of Andrew's new locator he was able to go out trick or treating this year.

Tina Marie C.

"Andrew can now go out trick or treating and I can have a little peace of mind, thanks to his iLOC wandering device."

Lou G.
