The Journal of Addiction Research & Therapy (JART) aspires to be the leading journal publishing the most exciting research in the field of addiction. Its scope covers biological, social, and behavioral aspects of addictions across addictive behaviors and patient groups. JART provides its contributors with two key advantages. One is the rapid decision process with the fastest possible turn-around between the acceptance of articles and their publication. The second one is on-line free access to the Journal contents. This barrier-free distribution ensures the maximum reach and impact of research it publishes.

The Journal of Addiction Research and Therapy under open access category aims to advance our understanding of the action of drugs and their addictive processes, diagnosis, harmful effects as well as assist in prevention and treatments of addiction. The Journal of Addiction Research and Therapy is an international, peer-reviewed journal publishing an overview of human research on substance abuse which includes the contents geared towards behavioral, psychological, genetic, neuro-biological, and pharmacological aspects.

The Journal of Addiction Research and Therapy explicates the complicated aspects of addiction, psychological and most probably physical addiction despite of its detrimental consequences and increased tolerance, as deemed by the drug addict himself to his individual health, mental state and unmanageable life style. The Journal is promptly available, and is freely accessible globally through internet to share the innovations of the researchers for scholarly advancement in this field.

Journal of Addiction Research & Therapy - Open Access uses online manuscript submission, review and tracking systems for quality and quick review processing. Submit your manuscript at
