

The Ex Factor: Review Examining Brad Browning's "Ex Back" Guide Released

SUMMARY: *ConquerHisHeart.com releases a review of "The Ex Factor" a newly launched training program for those eager for a second chance with their exes.*

The Ex Factor - a new home training program for folks desperate to reunite with their exes has just been released to the public generating a frenzied buzz of excitement throughout the online relationship advice community. The media attention surrounding the program's release has prompted an investigative review from ConquerHisHeart.com's Sean Roman.

"According to Ex Factor creator Brad Browning a 'window of opportunity' exists following break up during which as many as 90% of relationships can still be saved," says Roman. "During this time jilted lovers are often in a state of panic, as they urgently try to figure out the best course of action for getting their exes back. I believe it's critical that these love-sick individuals get the most helpful information available, so we make a point to review programs on the topic of relationship recovery on our website ConquerHisHeart.com. When I found out about Browning's new program I was eager to review it, in order to evaluate the validity of his reverse-psychology tactics"

The Ex Factor is available digitally online allowing customers instant access to all training materials including an audiobook version of the course, PDFs, and training videos, as well as additional bonus material.

"Our Ex Factor review explains that the system provides customers proven techniques to break past their exes' 'defense mechanisms' in order to re-program their 'emotional operating system' and access their subconscious, primal instincts," says Roman. "While this may seem a bit extreme to the casual reader, these are situations that indeed require folks to break out 'the big guns' so to speak and do what is necessary to save their relationships."

"One of the things that impressed us the most about this course was the fact that it is based on real, proven psychological principle," says Roman. "Browning's background is in cognitive psychology and social dynamics, and unlike other self-help guides we have reviewed, it's apparent that Browning's teachings are solidly backed by scientific research. We are very happy to recommend the course to our readers."
