

## THE DIFFERENCE OF QUALITY.

Casework hasn't changed in 50 years. The same plastic laminate that graced 1960s kitchens is still prominent in healing environments today.

Finding options that are as durable as they are attractive - not to mention modular, safe and maintenance-free - feels like an impossible task.

You shouldn't have to choose between form and function. Luckily, you don't have to. Merging exceptional design and healing environments, Shield Casework manufactures the leading line of modular solid surface casework, headwalls and custom architectural products.

Our philosophy is simple: we create beautiful products that are meticulously crafted, immaculately clean and unmatched in quality. Seamless construction; cleanable interior radius corners; and patented embedded connections make Shield superior to any other product.

If laminate isn't good enough for your countertops, why is it accepted elsewhere?

**SHIELD IS HERE, AND LAMINATE IS HISTORY.**

 Watch our video to learn why.

**SHIELD**  
CASEWORK®

Patented embedded metal inserts secure our hardware, providing nearly indestructible connections.

# SHIELD CASEWORK®

creates beautiful solid surface casework that is meticulously crafted, immaculately clean and unparalleled in durability.

Shield is a completely solid surface product. Our hygienic casework is nonporous, seamless and microbial-resistant.

Radius corners form completely cleanable edges that prevent contamination from residue buildup.
