

## Valoya delivers light for 5000m<sup>2</sup> of tree seedling young plants

Svenska Skogsplantor AB, a leading Swedish company in the forest industry has installed Valoya wide spectrum LED lights in two of their production greenhouses in Hallsberg, Sweden. The Valoya wide spectrum lights provides a maintenance free, energy efficient alternative to traditional high pressure sodium or red/blue LED lighting.

The Valoya AP67 spectrum provides the light required for the tree plants during the dark winter months with optimal energy consumption. The spectrum also offers a good working light providing lighting in the greenhouse allowing accurate quality control and pleasant working conditions.

### **About Svenska Skogsplantor AB**

Svenska Skogsplantor AB is the leader in forest regeneration and plants in Sweden. With refined seed and seedling quality, Svenska Skogsplantor AB offers the basis for a successful regeneration supported by various services, such as soil preparation and planting.
