

## **iPatientCare Announces its ONC 2014 Edition Meaningful Use Stage 2 Certified Complete EHR Designated as a Test EHR by CMS**

### ***“iPatientCare EHR Selected as one of the CMS Designated Test EHR”***

iPatientCare, Inc., a pioneer in mHealth and cloud based ambulatory EHR, integrated Practice Management and Patient Portal solutions announced the selection of iPatientCare EHR as one of the CMS Designated Test EHR.

As part of meaningful use Stage 2’s transition of care objective, measure #3 requires eligible professionals (EPs) and eligible hospitals/critical access hospitals (CAHs) to conduct one or more successful tests with the CMS designated test EHR during the EHR reporting period as one of the options. EPs and eligible hospitals/CAHs would be able to use iPatientCare EHR as one of the CMS Designated Test EHR, if matched by the National Institute of Standards and Technology (NIST) hosted “EHR Randomizer” software system.

“iPatientCare has been a leader when it comes to interoperability and supportive of the path-breaking efforts of CMS and ONC for making patient health records getting more interoperable across the continuum of care. Being selected under Designated Test EHR program gives us an opportunity to extend our services to the hundreds of thousands of physicians, in addition to the thousands of physicians being served by us today. This is iPatientCare’s small contribution towards the CMS’s goal of Better Health, Better Care, Lower Costs,” said Arnaz Bharucha, Senior Technology Officer iPatientCare.

Based on the results of the Test EHR Pilot program, CMS and ONC have finalized the technical capabilities that need to be in place in order to be designated Test EHR and the test process to be followed by providers. CMS and ONC launched the program on January 14, 2014 with designated Test EHRs that met the criteria and indicated interest in participating in the program.

“We are very proud of this rare recognition of being one of the CMS Designated Test EHR. We have worked hard to be an ONC 2014 Edition Meaningful Use Stage 2 certified Complete EHR. Being a Test EHR allows us to give something back to the community, and hence, we are very excited”, said Kedar Mehta, CTO, iPatientCare, Inc.

## About iPatientCare:

iPatientCare, Inc. is a privately held medical informatics company based at Woodbridge, New Jersey. The company is known for its pioneering contribution to mHealth and Cloud based unified product suite that include Electronic Health/Medical Record and integrated Practice Management/Billing System, Patient Portal/PHR, Health Information Exchange (HIE), and mobile point-of-care solutions that serve the ambulatory, acute/sub acute, emergency and home health market segments.

iPatientCare EHR 2014 (2.0) has received 2014 Edition Ambulatory Complete EHR certification by ICSA Labs, an Office of the National Coordinator-Authorized Certification Body (ONC-ACB), in accordance with the applicable eligible professional certification criteria adopted by the Secretary of Health and Human Services (HHS).

Full certification details can be found at [ONC Certified Health IT Product List](#).

The ONC 2014 Edition criteria support both Stage 1 and 2 Meaningful Use measures required to qualify eligible providers and hospitals for funding under the American Recovery and Reinvestment Act (ARRA).

The company has won numerous awards for its EHR technology and is recognized as an innovator in the field, being a pioneer to offer an EHR technology on a handheld device, an innovative First Responder technology to the US Army for its Theatre Medical Information System, the first to offer a Cloud based EHR product. iPatientCare is recognized as one of the best EHR and Integrated PM System for small and medium sized physicians' offices; has been awarded most number of industry Awards; and has been recognized as a preferred/MU partner by numerous Regional Extension Centers (REC), hospitals/health systems, and academies.
