## Chronic Disease Self-Management Program

An Evidence-Based Practice ⓘ

### Description

The Chronic Disease Self-Management Program (CDSMP) is a workshop for people with chronic health problems. The program is presented by trained non-health professionals with chronic diseases in community settings over the course of six weeks. Individuals with

## UNLOCK DATA. GAIN KNOWLEDGE. FOCUS RESOURCES. MEASURE RESULTS.

The leading population health improvement platform helps make your programs vital and strategic.

### FROM INSIGHT TO ACTION

Today's environment of results-based accountability creates a whole new set of demands on your community and population health improvement initiatives. The old adage, "You can't manage what you don't measure," has never been more true.

To be successful requires an integrated approach for pinpointing at-risk populations and areas of need, implementing programs proven to affect change, creating efficiencies by partnering with internal and external groups, then tracking and reporting your results in a transparent way to all your stakeholders.

The HCI Platform empowers you to do all this and more. Mapping and data visualization tools readily identify intervention opportunities for targeting resources. A database of thousands of evidence-based programs lets you filter to find the most appropriate for your strategies. Collaboration

centers bring like-minded groups together to align objectives and orchestrate core capabilities. And customizable trackers and indicators provide a "single source of truth" for measuring success.

### YOU ARE NOT ALONE

HCI brings you much more than just technology. You'll get deep experience from our team of thought leaders in healthcare transformation, public health and health informatics. Add to that the power of hundreds of members in our Community of Clients and you've got an instant support network to tap into for ideas, brainstorming, or as a sounding board.

Now you can jump-start your initiatives with the tools and resources to make your organization a showcase of innovation.

### SEE FOR YOURSELF

The award-winning HCI Platform is now in 35 states and covering more than 100

million lives! The best way to see what it can do for you is to schedule a quick online demo and discussion. Pick a time that's most convenient: [healthycommunitiesinstitute.com/demo](http://healthycommunitiesinstitute.com/demo)

*"The HCI Platform is as easy as 1, 2, 3: Gain insights on key health needs for sub-population in services area; identify and implement the best evidence-based program to address chronic disease self management; track the outcomes to show improved health and cost savings. Our leadership is 100% behind the successful and cost saving community interventions."*

# Two Implementation Options Each One Customizable & Flexible

## HCI PLATFORM

### Comprehensive Stand-Alone Portal

OR

### Wrapped Within Your Website

#### The HCI Platform Includes:

- Over 100 Health and Quality of Life Indicators
- Add and Customize Local Content
- Healthy People 2020 Trackers
- Performance Tracking
- Database of Over 2,000 Proven Programs
- Collaboration Center to Maximize Partnerships
- Report Assistant to Quickly Present Data

Ideal for community collaboratives, foundations, other partnership-based initiatives, and public health agencies.

**Provides a solid foundation for PHAB, MAPP and Collective Impact strategies.**

Enables hospitals, health systems and other organizations to embed the platform's functionality within their branding.

**Helps to meet IRS 990 requirements for CHNA and Implementation Plans.**

## GET THE MOST VALUE FROM THE HCI PLATFORM WITH OUR PROFESSIONAL SERVICES

### Secondary Data Analysis

We'll review, analyze and synthesize your data elements, then provide a comprehensive narrative to save you time and complement your reports, grant proposals and assessments. This is a great way to fast track your CHNA!

### Community Input

Our team gathers input from the community and key informants through convenience surveys, phone interviews, interactive screen sharing, and more.

### Identification of Top Needs and Prioritization

From analyzing data to facilitating group sessions with stakeholders, we assist with identifying and prioritizing your top community needs.

### CHNA/Implementation Strategy Guidance and Report Development

We work with you on a customized approach for your CHNA and Implementation Strategy, including authoring the reports to reflect your community's strengths, needs and priorities.

### Showcase Your Work

By developing custom web pages, Initiative Centers and Trackers, we extend the advantages of the many tools in your HCI Platform.
