

## Gulfstream G650

The Gulfstream G650 is the world's fastest ultra-long-range business jet with capabilities of flying from New York to Shanghai or London to Los Angeles. The spacious 13-passenger cabin is wider, longer and taller than any other business jet in its class. Gulfstream has made cabin management effortless with an enhanced smart-phone interface to control all cabin systems. Passengers also have access to high-speed wireless internet, HD entertainment, iPod connectivity and integrated satellite phones, making this the most technologically advanced charter aircraft in marketplace.
