303 TECHNOLOGY

Software-Defined Solutions
IT ARCHITECTURE FOR THE CLOUD ERA

Product Offerings

— **STORAGE**
- — EMC Isilon
- — EMC VMAX
- — EMC ViPR
- — EMC VNX
- — EMC XtremIO

— **AVAILABILITY**
- — EMC Avamar
- — EMC Data Domain
- — EMC RecoverPoint
- — EMC VPLEX

— **COMPUTE VIRTUALIZATION**
- — VMware vCloud Suite
- — Cisco UCS
- — EMC VSPEX Private Cloud
- — VCE Vblock

— **NETWORK & SECURITY**
- — VMware NSX
- — Cisco Nexus

— **CLOUD COMPUTING**
- — EMC VSPEX Private Cloud
- — VCE Vblock

303 Technology delivers strategic solutions and services to our clients based upon their unique business requirements. From tactical assessments through solution implementation to fulfillment, installation and configuration of the underlying tools, 303 delivers a broad spectrum of solutions to meet our client's needs.

Software-Defined Data Centers (SDDC) are the next step in the evolution of virtualization and cloud computing as they provide a solution to support both legacy enterprise applications and new cloud computing services. A SDDC encompasses a variety of concepts and data center infrastructure components. 303's solution strategy for SDDC is based on the "best of breed" hardware and software components of VMware, Cisco, EMC and VCE.

Our key solution focus areas include:

STORAGE & AVAILABILITY
303 is uniquely qualified to plan and implement leading-edge storage and availability solutions to keep data and applications continuously available across all hardware and operating system platforms in the data center.

COMPUTE VIRTUALIZATION
Now a standard infrastructure technology, compute virtualization forms the basis of the SDDC and 303 is your source for comprehensive solutions and services.

NETWORK & SECURITY
Maximize operational efficiency, agility and scalability of the business data center with network virtualization and security from 303.

CLOUD COMPUTING
Cloud boosts productivity, regulates overall technology costs, enhances flexibility and drives innovation. Engage 303 today to take your business to the cloud.

ABOUT 303 TECHNOLOGY
303 Technology empowers client innovation by combining advanced IT solutions with experience-driven knowledge and best practices. Our client-focused team delivers a competitive advantage by reducing business risk, costs and complexity across the enterprise. 303 enables clients to operate with leading-edge, software-defined solutions focused on storage, availability, compute virtualization, network security and cloud optimization.
