

## What We Recover:

- Deleted Data
- Reformatted Drives
- Damaged Drives
- Broken Flash Drives
- RAID arrays (all types)
- Deleted SD Card Pictures
- Mobile Devices
- NAS & SAN
- And much more...

If you never want to see us,  
follow our advice!!

- Always keep a backup copy of your data.
- Consult an IT professional about a comprehensive backup strategy.
- Always backup your data before system upgrades or installing new hardware.
- If your drive starts making sounds (e.g. clicking) shut down your system immediately.
- Never move an external drive while it is spinning.
- Always eject USB devices.
- Never store important data on a flash (thumb) drive.
- Never run chkdsk on a failing drive, you may make the problem worse.
- If your system asks you to reformat or repartition your drive - DON'T

Free Evaluations  
No Data, No Fee Guarantee

Referral Fees to Professional IT Companies

 **We are Local:**

Desert Data Recovery are your local 'certified' data recovery experts. We are passionate about customer service and have a recovery center based in Phoenix, so don't send your drive to a remote location.

 **Confidentiality:**

Desert Data Recovery is a privately run, professionally managed company (we are not a franchise). Your data will not be seen by any person outside of the company. We know how important your confidentiality is.

 **Free Evaluation:**

We will assess your storage media using specialized data recovery hardware and software. We can see exactly how much damage has been done to your drive and estimate the work needed to recover the data. We have 'flat rate' fees for most hard drive recoveries.

 **Data Recovery Equipment:**

Desert Data Recovery utilizes specialized diagnostic and imaging equipment to perform a forensic evaluation of your hard drive or other type of media. This equipment is specially designed to put the least amount of stress on already failing media, allowing us to retrieve every possible piece of data.

 **Full Service Company:**

We are a full service data recovery company with a Class 10 Clean Room facility. We recover hard drives that need to be physically taken apart and have parts replaced in a dust free environment.

**No Data, No Fee Guarantee**

If we can't get your critical files, there's no charge.

 **Hard Drive Recovery Pricing:**

The majority of hard drive recoveries can be completed without the need to disassemble the drive in our clean room. These are called logical recoveries and are at a lower price. If the drive needs clean room work to replace parts, a price will be quoted after the evaluation.

For a more complete price list including Flash Drives and RAID Arrays, please visit the pricing page on our website.

 **Referral Fees:**

We also offer referral fees to professional IT companies. Please visit our website for more information.
