## Completely Customizable

Want more, You can still use all the power of the Salesforce platform. built natively on force.com. Its completely extendable using Apex Programming language for you to expand to as you like.

## Integrate with your other Accounting App

Love your existing Accounting system, but hate that its on-premise or does not work seamlessly with Salesforce? You can now use AccountingBook and integrate with your other Accounting system (like QuickBooks) get the best of both worlds. For example, create Invoices and take payments in Salesforce then, log entries in your other Accounting App.

## Bottom Line

AccountingBook gives you the most advanced way of managing your accounting as you grow out of your existing Accounting packages like QuickBooks, Microsoft Dynamics GP, Intacct. Now you can do more by reducing double data entry, increase visibility and streamline business processes. Get started at [www.avankia.com/accountingbook](http://www.avankia.com/accountingbook)
