

PRESS RELEASE

New Video Provides Visual Overview of Chemical Management Systems

Valdata Systems Publishes New Video Explaining the Features and Benefits of Chemical Management Systems.

April 4, 2014: Valdata Systems has launched a new video explaining Chemical Management Systems, and how they provide a significant improvement over traditional manufacturing methods.

This video replaces the video previously issued in 2013, and answers many of the most common questions related to chemical management software, including: what this type of system does; how return on investment can be calculated; and how it combines inventory software, manufacturing execution, formulation software and lms to effectively improve productivity and increase bottom line profits.

The video demonstrates highlights areas often in need of improvement in a manufacturing environment, then compares traditional “fixes” with implementing a chemical management system.

“More and more organizations are turning to this type of integrated solution each year. We wanted to provide a concise, easy to understand overview of why.” Susan Balsamello, Marketing Director

The video can be found both on You Tube and on the Valdata Systems website at:
