Retail
- Speed up checkout, reduce abandoned shopping carts
- Real-time access to inventory and customer data
- Process sales transactions from anywhere in the store or at remote locations

Hospitality
- Increase tableturns and average check size with tableside orders and payments
- Wirelessly send orders to kitchen
- Select or withhold modifiers/add-ons
- Put orders on hold and reopen tickets
- Reduce the risk for fraud by processing payments in front of the customer

Field Sales/Service and DSD
- Create and track work orders
- Manage inventory
- Track labor, parts and material
- Create invoices and process payments onsite for better cashflow
