

Who We Are?

Weaves Industries has grown and will continue to grow as a direct result of holding fast to our core values of Honour, Courage, and Commitment.

Honour: We will always take pride in our work and ensure the quality and integrity of each job that we are tasked with completing.

Courage: We will always have the courage to do what is right, no matter the consequences.

Commitment: We will continue to be committed to our clients, our jobs, and our quality craftsmanship.

Management

Scott Weaver, President & CEO

As the founder of Weaves Industries, Scott Weaver has been President & CEO of the company since 2007. Prior to the formation of Weaves Industries, Scott Weaver had been operating in the welding and fabrication industry for over ten years. He trained in Alberta to become a master welder at SAIT Polytechnic and to become a trusted safety officer through the Alberta Construction Safety Association's National Construction Safety Officer program following his well-decorated term of service with the US Marines. He is currently licensed as a Journeyman Red Seal CWB Welder and has nearly completed his NCSO certification. He has worked on thousands of unique jobs in the welding, fabrication, and construction industries and has overseen a standard of excellence through the development and integration of standardized audit safety programs. He has built a solid reputation for continuing to implement and uphold his personal core values of Honor, Courage and Commitment through his company.

Welding & Fabrication

Weaves Welding thrives on new and dynamic projects, easily adapting to dynamic projects. If you can weld it, chances are, we have already done it! Check out some of our custom welding & fabrication jobs below:

Maintenance & Repairs

We are a full-coverage welding and fabrication company that can help with the maintenance of your entire business!

Property & Structural

From HVAC systems at the top of sky-scraper buildings to the basements of apartment buildings, we can help you maintain just about any aspect of your property that can be welded. For the interior, we can help with furniture repairs and fabrications, hand rails, steps, chairs, stools, and more. On the outside, we can maintain your buildings, your garbage enclosures, fences, decks and more. If it's a form of metal, we've got you covered.

Heavy Truck Repair

We can maintain and repair your heavy duty truck or trailer's frame, axle, fender, and other structural components.

Commercial Kitchen

The modern commercial kitchen comes abundantly equipped with stainless steel, particularly in the food preparation stations. The heat stress in these areas can cause the steel to wear out, become warped, or even break the welds. We have a wealth of experience to work from when repairing your commercial kitchen, and can fix these problems quickly. When working on your kitchen, we use small miller welding equipment and clean the equipment after every use. If it's a form of metal, we've got you covered.

We know that repairs can be more than an inconvenience during normal business hours, so our welders will work with your chef and staff to accommodate both the repairs and your business schedule before or after business hours.

"We are a full-coverage welding and fabrication company that can help with the maintenance of your entire business!"

How We Think

Health & Safety

For Weaves Industries, the health and safety of the workers at our jobsites is a top priority. Every one of our employees is trained in the Health and Safety standards as defined by the Occupational Health & Safety Act enacted by Alberta Human Services. We also ensure compliance with the regulations enacted by the Alberta Construction Safety Association, so you can rest assured that your workers and your jobsite is safe and in compliance with regulations.

Customer Service

Our clients depend on the efficiency, reliability, and availability of our welders. We understand that you rely on your equipment or structure to make your company money, and that the longer it is out of service that's less money you make. This is why Weaves Industries has a unique policy of dispatching welders to your jobsite within 24 hours! In fact, the majority of our jobs are dispatched within only a few hours, and our job completion times are some of the best in Alberta!

Quality Control

Each weld we make is completed with precision and quality, and we work to ensure this craftsmanship with our Quality Control policy. Once your job is complete, we will either have another B-Pressure certified and ticketed journeyman welder inspect it in person for potential flaws, or when inspecting in person is impractical or impossible, we will use state of the art digital imaging technology to inspect each weld for potential flaws from afar.
