

Why the Elephant?

Inspired by the example of the elephant — a noble creature whose great size and power are wonderfully blended with compassion, longevity and commitment to the young of the herd.

The elephant uses its trunk to touch, to play and to **trumpet** as a means of communicating its affection for family and friends. The mighty elephant is also a symbol of strength. Protecting the herd and delivering the young to safety and sustenance.

The elephant is the perfect symbol for our organization's leadership in behavioral treatment services. Our team is committed to providing families, educators, healthcare professionals, and insurers the most professional, evidence-based ABA services available.

Every day, we tenderly care for each client we serve and are devoted to maximizing their potential.

Our Mission. Our Promise.

Our Commitment.

Trumpet Behavioral Health maximizes the potential of children, adolescents, and adults with autism spectrum disorders and other developmental delays by providing leading evidenced-based treatment services by ABA experts and by engaging in clinical research to find the most effective and efficient treatments. We also empower our clients' families, educators, and healthcare professionals through training and education services.

We empower our clients to maximize their potential.

Why Choose Trumpet?

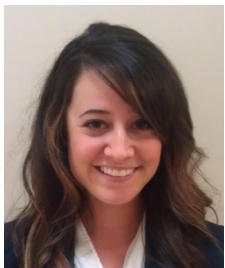

Proven Methods

Trumpet Behavioral Health's clinical services are based on the principles of **Applied Behavior Analysis (ABA)**. This systematic, evidence-based approach helps address challenging behaviors and skill deficits in several areas, including communication and social skills. ABA therapy is widely recognized as the most effective treatment for children with Autism Spectrum Disorders (ASD) and other exceptional behavioral needs. Our goal is to create results that have lasting, positive change in the lives of our clients.

Team Approach

Our Board Certified Behavior Analysts (BCBAs[®]) and Therapists collaborate with educators, healthcare providers, families, and most importantly, each individual we serve. We individualize assessments and tailor treatment to each client to ensure they receive the best clinical care available for their special needs. What's more, we provide over 40 hours of intensive training for our team, going beyond what is required by state mandates. This ensures our team members provide clients and their families with unparalleled care.

Senior Clinician

Sarah Veazey
MS, BCBA

SARAH VEAZEY is a Senior Clinician and Board Certified Behavior Analyst who is bilingual in Spanish. She acquired her Master of Science degree in Behavior Analysis at Auburn University and exercises a variety of expertise and experience in her role including parent and teacher training, toilet training, early intervention techniques, discrete trial training, functional assessments, social skills, verbal behavior intervention and more.

Who we are

Trumpet Behavioral Health (TBH) specializes in the treatment of children, adolescents, and adults with autism spectrum disorders, developmental delays, and other exceptional needs.

We provide behavioral treatment, consulting, education, and special training for parents, educators, and other professionals. Through our network of nearly 800 passionate and highly skilled team members, we offer families exceptional behavior management programs based on Applied Behavior Analysis (ABA) Therapy.

Our team provides effective clinical services in homes, schools, and communities – intensive treatment centers coming soon to Texas. Our clinicians are Board Certified Behavior Analyst[®] (BCBA[®]) providers and are supervised by Ph.D. level Board Certified Behavior Analysts[®] (BCBA[®]) providers.

Linda A. LeBlanc, Ph.D., BCBA-D[®] is the Executive Director of Research and Clinical Services at Trumpet Behavioral Health.

Our Philosophy

We respect the uniqueness of each individual, including their thoughts, feelings, and actions. We also value the importance of our clients' family, school, and community relationships.

We acknowledge the values and strengths of these individuals, their families, and others who teach and support them.

We recognize the need for and are committed to working collaboratively within each individual's environment and supportive relationships to effectively nurture human growth, improve behavioral functioning, and enhance the life quality of each individual.
