CLINICAL FEATURES AND BENEFITS

IMPROVE CLINICAL DECISION MAKING AT THE POINT OF CARE WITH veEDIS™

veEDIS is the most advanced Emergency Department management software available.

Track and Manage: Presented as a matrix or as a graphic depiction of the department, the veEDIS status boards provide comprehensive information at a glance. Both patient status and department processes are presented clearly and informatively. My View™ provides user-defined filters to render the most pertinent information and ancillary study results, alerts, and other patient information which can be accessed directly from the status board.

Document with Confidence: Intuitive and easy to use, veEDIS delivers cognitive prompting, support and guidance to physicians and nurses concurrent with their real-time comprehensive documentation. Gathering and delivering patient data quickly and accurately via a touch screen interface, veEDIS improves the Emergency Department process and enhances quality of care and patient safety.

See-where-you-are and go-where-you-want shortcuts combine to make the veEDIS interface most efficient for capturing structured medical information. Prose-like output with images helps to provide a complete and thorough document which optimizes billing and reduces risks.

Ordering Made Easy: Initiate protocol orders from triage based on complaint, age and gender to standardize care and improve efficiency. Shortcuts, which are user defined, are presented for quick and easy order entry. Frequently used orders are learned by the system and presented to the provider for subsequent use. Medication orders alert for allergies and drug interactions. Required information for ancillary departments is easily captured during order entry process. Reassessment of all orders is clearly documented with only a few clicks. The status of all orders is tracked and alerts provided for a variety of process delays.

"veEDIS gives our Emergency Department high quality, legible documentation for both nurses and physicians and it's very user friendly. Compared to other inpatient systems, veEDIS is like driving a luxury car instead of riding a bicycle with a flat tire."

- Karen Ford, Chief Nursing Officer, Sabine Medical Center
operated by Allegiance Health Management, Many, LA

Risk and Guidance: veEDIS introduces Data Incongruity™ to the market, a robust module that alerts for inconsistent documentation by a single user, multiple users and across modalities. Care Trak™ utilizes Evidence-Based Medicine and Best Practice to surveil all documentation, orders, vital signs and laboratory results for decision support. Alerts and summaries are presented real-time with reference citations to ensure patient safety and facilitate case management evaluations.

Prescriptions and Teaching Instructions: Generate prescriptions with a single click, or make and share shortcuts to generate batches of prescriptions with a single click! Prescriptions, too, alert for allergies and drug interactions. Over 3,000 4th-6th grade-level teaching instructions are automatically linked to clinical impressions, prescriptions, abnormal labs, social history and more to improve efficiency and standardize treatment plans.

Quality Unmatched: veEDIS is content rich and ready which, in addition to facilitating deployment, efficiently provides users with the content they seek as well as items that they might not seek but should. veEDIS has the richest content in the industry to ensure users address medical scoring systems (NIHSS, Suicide Lethality, GCS, etc.), clinical documentation (Brugada, posterior wall infarctions, etc.), and Clinical Quality Measures with simple clicks or touch of a screen.

veEDIS ACHIEVES CLINICAL ACCEPTANCE WITH ITS TOP 5 INTUITIVE, USER-FRIENDLY FEATURES AND BENEFITS.

User-friendly CPOE

Direct access to CPOE makes order entry fast and painless.

"See and go" navigation

(See-Where-You-Are and Go-Where-You-Want) Simplified navigation allows instant access to any area of documentation, including touch screen for easy navigation!

veEDIS CLINICAL SYSTEMS™

Data incongruity alerts

Data incongruity alerts ensure consistency of documentation within a single user, among multiple users and across disciplines.

Deep clinical decision support

veEDIS CareTrak™ is a decision support tool that utilizes a robust set of algorithms predicated on evidence-based medicine to evaluate clinical information in real-time to help direct patients to the right care setting-an invaluable tool for revenue and risk management.

Point-of-care Core Measure monitoring

Real-time prompts and documentation audit ensure compliance for CMS Core Measures / PQRI before a disposition is made.

ABOUT veEDIS™

veEDIS is an indispensable tool for effective management and continuous process improvement.

veEDIS is Emergency Department Information System (EDIS) software designed to streamline emergency department management. Created by a team of credentialed physicians and nurses, veEDIS combines real emergency department experience with advanced technology to provide software that assists in meeting quality patient care and safety goals.

veEDIS provides hospitals with an easy way to move to a current state-of-the-art Emergency Department Information System, avoid significant IT capital costs, and position themselves quickly to meet Federal guidelines to receive incentive payments.

veEDIS is certified by the Drummond Group as an EHR technology (CEHRT) that can qualify hospitals to receive payments under *Medicare and Medicaid Electronic Health Record Incentive Programs* (Meaningful Use) enabling them to seek stimulus funding under the American Reinvestment and Recovery Act (ARRA).

veEDIS CLINICAL SYSTEMS™

2011-2012 Drummond certified™ ONC-ATCB EHR MODULAR

This EHR Module is 2011/2012 compliant and has been certified by an ONC-ATCB in accordance with the applicable certification criteria adopted by the Secretary of Health and Human Services. This certification does not represent an endorsement by the U.S. Department of Health and Human Services or guarantee the receipt of incentive payments.
