

Idol Lash: Review Examining Eyelash Enhancer Released by NaturesMagicGift.com

Summary: *NaturesMagicGift.com releases a review of “Idol Lash,” an eyelash enhancing serum which promises to deliver healthier, thicker looking, longer, and more beautiful eyelashes, with visible results in only 28 days.*

Idol Lash – an eyelash enhancing serum, which promises to provide customers with “beautiful celebrity eyelashes” in just a few weeks time has created quite a buzz in the press lately for its positive results in clinical trials. The widespread media attention lavished on the eyelash enhancer has caught the attention of NaturesMagicGift.com's Kerri DeMarco, prompting an investigative review.

“Not everyone is born with naturally long, thick, healthy-looking lashes,” says DeMarco. “And, for those of us looking for a product to help us get that ‘movie star,’ look to our eyes, there simply aren’t that many options out there—especially, if you’re wary of chemical-based cosmetics. In fact, many cosmetics designed to enhance your lashes, can come with a risk of irritating your eyes or sometimes they can have more dangerous side effects, such as potential eye damage. That’s why, when I learned about Idol Lash and the safe, natural ingredient used to formulate it I was intrigued and wanted to investigate further for our readers.”

Idol Lash features all-natural ingredients such as chamomile extract, honey extract, keratin, proteins and vitamins, and various moisturizing agents. These ingredients are all designed to condition the eyelash follicles in order to stimulate healthy growth, which in turn helps the user grow long, healthy, thicker looking eyelashes.

“Overall, we were quite impressed with Idol Lash.” reports DeMarco. “One of the key selling points of this product is that it’s extremely easy to use. The user simply applies the serum onto the eyelash line with the applicator just like with any ordinary eyeliner. In order to seek maximize results, the product has been shown to be more effective when applied before bed after a gentle cleansing of the area. The trials show that within a few weeks, users have reported longer, thicker looking, healthier eyelashes.”
