

Scytl Phone Voting

Secure phone voting technology that enables citizens to vote privately through a standard or mobile phone.

Scytl Phone Voting enables citizens to vote through a standard or mobile phone privately and independently at the polling place or from home. This telephone voting system is designed to provide alternatives to absentee voting and improve the voting experience for disabled voters and those with language difficulties.

For those living in remote areas where there is minimal or no Internet connectivity, this telephone voting system enables any voter to cast their vote privately with a standard landline or mobile phone.

“ I was excited to be able to vote independently for the first time. I used the phone voting facility and found it to be better than adequate. The assistance I received was attentive and professional.”

Ian Westerland,
blind voter
Victoria, Australia.

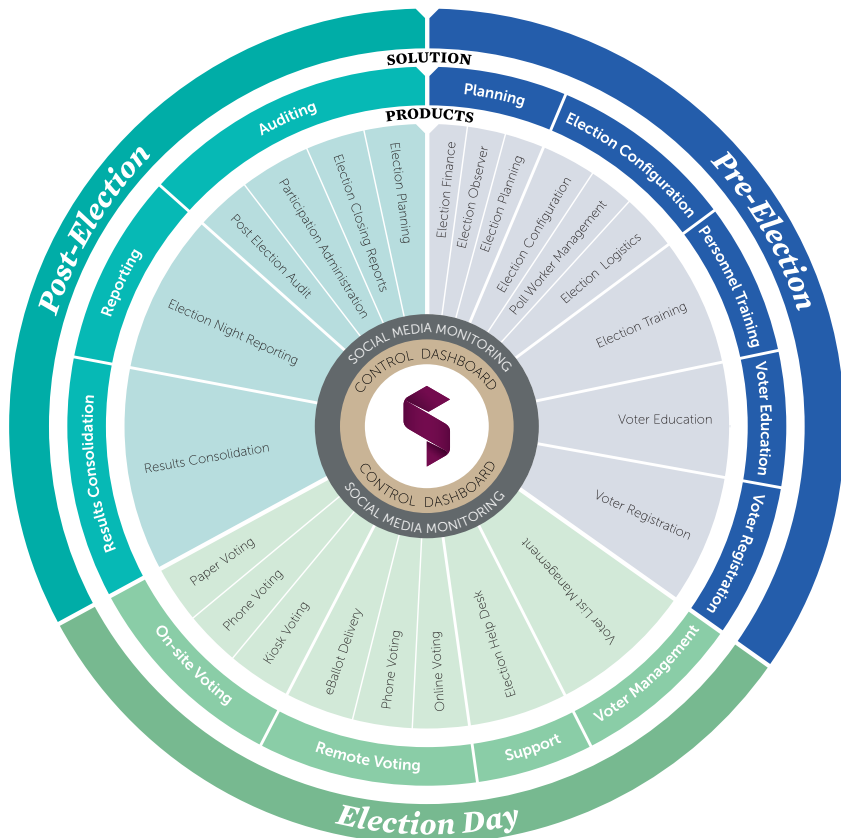

- Cost-effective voting option compatible with multichannel voting.
- Clear audio instructions and ease of use.
- Voter privacy and voter validation.
- Fully auditable.

SAMPLE CUSTOMERS

Scytl e-Election Platform

Modular, integrated and secure end-to-end election management and voting platform.

Pre-Election

Scytl's solutions assist election administrators with the planning, organizing and training activities that accelerate as each new Election Day approaches. With a wide variety of software solutions, Scytl provides efficiencies built specifically for elections and the officials that conduct them.

Election Day

During Election Day, the most critical period of the election cycle, any number of issues can arise. Through our voting and help desk solutions, election officials can rest assured that the most robust and user-friendly tools are being utilized. Whether in-person or remotely, voters will experience a state-of-the-art interface to cast their ballot and the resources to identify and answer questions.

Post-Election

After Election Day, work is far from over. This is where some of the most important steps take place to ensure accuracy and effectiveness of the voting system, aggregate and present election results for public consumption, and use the information learned from this election to make the next one even better.
