

## Delta T Systems and Menges Roller Company Announce Partnership

By Jordan A. Kalland  
May 13, 2014

**Delta T Systems & Menges Roller Company** have recently partnered to deliver fully-integrated chill and heat transfer roll solutions to the plastics, paper and steel converting industries. Modern substrates and processes are placing an increased importance on achieving very specific web temperatures, which in turn require a consistent roller temperature. Delta T Systems', chillers and temperature control units work in perfect unison with Menges' lineup of single and double-shelled thermal rollers. Together, they'll help increase process speeds, reduce waste and produce higher quality products.

### About Delta T Systems

Delta T Systems, located in Richfield, WI, has dedicated itself to one single discipline, process temperature control. Since 1990, Delta T Systems has helped production systems run more efficiently, thanks to their 160 years of combined experience, knowledge, and engineering know-how.

Delta T Systems manufactures water and oil [temperature control equipment](#), as well as, portable air and water chillers. Their full line of system solutions are available in many sizes to fit all process needs, with temperature control ranges from 20°F (-6.67°C) up to 650°F (343.33°C). Incorporating sound fundamental engineering principles ensure that users receive accurate and reliable temperature control and years of unmatched performance. Delta T Systems, American made, high quality units will beat the competition in performance, delivery, and service every time. ### About Menges Roller Company

Menges Roller is a leading manufacturer of high-performance [heat transfer rollers](#) and chill rolls. Located in Wauconda, IL, Menges utilizes CFD thermal modeling technology and advanced manufacturing processes to produce their award-winning line of liquid-filled heat transfer rolls.

Menges offers multiple design configurations and custom-fabricated solutions to meet the needs of temperature-critical processes such as laminating,

coating and extruding. Menges Roller Co. is an industrial roller expert with over 40 years of experience that has the ability to engineer and manufacture the most difficult roller designs. For more information about [Menges Roller Company](#) please visit the website.
