# ANYWHERE POINT OF CARE
IT'S THAT EASY

APTUS MobileCare™

APTUS MobileCare™ is a secure patient-centric contextual messaging and communications solution that reduces communications related errors by a patient's care team. It is an award-winning solution that improves clinical communications workflow among clinicians in the patients' circle of care from the time he enters a hospital through post discharge.

It is an integrated clinical communications solution that bridges the communications and healthcare IT silos (like EMR/CPOE, LIS, RIS, PACS, etc.) to provide in-context patient or clinical information during a call for faster decision makling and better patient care.

MobileCare eliminates the need for clinicians to carry pagers and proprietary devices by working on the smartphones and tablets they already have.

BENEFITS OF MOBILECARE

- Faster decision making and higher HCAHPS (patient satisfaction) scores
- Improved nurse to physician communications, productivity and satisfaction
- More timely decisions reducing length of stay
- Improved ROI
- Enhanced reimbursement potential through meeting MU and Accountable Care Organization standards

MobileCare combines secure contextual messaging and communications with real-time access to patient information for faster decision making

SECURE COMMUNICATIONS
- Text and picture messaging
- Voice calling & messaging
- Group message/calling
- Voice and video conferencing
- Availability/Status/Presence
- Routing and escalations
- Calendar/phone/fax

SEAMLESS INTEGRATION
- EMR and HIT systems — LIS/RIS, PACS, CPOE, etc.
- Nurse Call Systems
- Scheduling Systems
- PBX
- ADT systems
- Active Directory Server

NOTIFICATIONS AND ALERTS
- Critical alerts and notifications
- Rules based alert filtering
- Messages and Alert escalations

APTUS PLATFORM
- HIPAA Compliant
- Secured using 128 bit encryption key or higher
- Interfaces: SIP, HL7, DICOM
- iOS & Android Platforms

MOBILECARE
EASY BECAUSE IT'S PERSONAL

MobileCare is simple and easy to use and works with the smartphones and tablets already being used on a daily basis by healthcare staff. This eliminates the expense, IT support and learning cost associated with adding new technology.

- Consolidate devices, calendar, and phone through one application
- Shared device support for dedicated staff—nurse and support staff
- Individual device support for physician specialist and affiliates with attending and admitting privileges
- Enabling "link and share" of patient information from HIS when necessary
- Customize for medical specialties, such as Emergency Department, Cardiology, Oncology and others

Synergizing Communications and Healthcare IT systems to deliver upto 60% reduction in clinical communications time around frequent workflows

Availability/Status

Video visit

Find/locate clinicians

MobileCare™

VIDEO VISITS

HD Video and IM chat consultation of doctors with remote caregivers.

Reduces expensive and time-consuming travel.

CLINICIAN-ON-CALL

On-call scheduling for providing urgent specialist consultation on-demand.

Significantly improve care team's response time

PATIENT CONTEXT

Access and share patient records from HIT systems during a chat or voice/video call.

Faster decision making with reduced errors.

Respond to Patients

Access/share/act on information

Group consults

Clinician consults

Secure Communications

PERSONAL REACH

Choose to be reached at alternate numbers — office, mobile, assistant, answering service, etc.

Extended reach and greater flexibility to docs

By connecting across the diagnostic and treatment continuum, healthcare professionals share and utilize real-time data, updates and results to turn raw information into educated insights and better healthcare decisions..

No new technology. No learning curve. Simply results.
