measures to increase competition and stimulate the economy that could positively affect the market. The FDIs from long-term established companies such as Fiat and Volkswagen have resulted in the increased capital in automobile industry. Brazil, the leading automotive market in South America, is largely controlled by three major companies: Fiat-Chrysler, Volkswagen, and General Motors. The increasing trend in the production has prompted strong investments from a number of manufacturers, thus contributing a larger share of FDIs. Argentinean market is growing at a rapid rate with cheap labor force available in the country.

This 144 pages market research report and its analysis is supported with 34 data tables and 20 figures, which along with it's comprehensive Table of Contents can be read at <http://www.reportsnreports.com/reports/280775-south-american-automotive-production-outlook-to-2018-by-vehicle-type-passenger-cars-lcv-and-hcv-fuel-type-gasoline-diesel-and-others-and-key-country-level-markets-brazil-and-argentina-.html> .
