iPatientCare Enhances Electronic Prescription Feature for iPad EHR

iPatientCare Introduces Powerful iPad Driven Electronic Prescribing Platform that Combines Advanced Patient Care with the Mobile Usability of the iPad to Help Physician Practices

iPatientCare, Inc., a pioneer in mHealth and cloud based ambulatory EHR, Integrated Practice Management and Patient Portal Solutions, announced enhanced functionality for the ePrescribing / eRx in iPatientCare iPad EHR app available on the App Store. Hundreds of medical practices already use the iPatientCare iPad EHR app. Now physicians can use the app for advanced electronic prescriptions.

As a leading provider of mHealth solutions, iPatientCare's fully-integrated, robust EHR system streamlines the prescription process and reduces errors with eRx. This electronic prescription tool allows physicians to easily draft and renew prescription orders, customize provider favorite's lists, and document drug and allergy interactions to increase patient safety. iPatientCare enhances productivity with easily adaptable eRx process which is built to match the

workflow of each physician and will help them to send error-free prescriptions to pharmacies in the US on their iPad and iPad mini.

"iPatientCare's Electronic Health Records software integrates a breakthrough patient care platform with the mobility of the iPad to help medical practice triumph in every setting. With just a few clicks, providers will be transmitting safe and efficient prescriptions through iPatientCare eRx on iPad", said Kedar Mehta, CTO, iPatientCare. "In addition to that iPatientCare has been awarded with the SureScripts White Coat of Quality for 2013. White Coat program is part of a larger effort to increase e-prescribing quality and accuracy, by recognizing the organizations that excel in those areas", he further commented.

"mHealth is an integral part of iPatientCare's product strategy. With a carefully designed workflow and intuitive touch-screen based user interface, iPatientCare's eRx system on iPad, for prescribing drugs and other applications, ensures reduction in the number of drug-related mistakes. Physicians can enter the prescription type, quantity, and pharmacy location directly into the iPad EHR app at anytime, anywhere", said Shripal Shah, Senior Technology Officer, iPatientCare.

"We had received tremendous response from the healthcare provider community for our native iPad app. Many reported their experiences on the Apple Store expressing their joy of using most easy to use EHR app. We will continue to offer new features and enhance existing ones based on the needs and requests of health care professionals" said Mac Gurnani, Lead, Customer Support and mHealth Innovations, iPatientCare.

About iPatientCare:

iPatientCare, Inc. is a privately held medical informatics company based at Woodbridge, New Jersey. The company is known for its pioneering contribution to mHealth and Cloud based unified product suite that include Electronic Health/Medical Record and integrated Practice Management/Billing System, Patient Portal/PHR, Health Information Exchange (HIE), and mobile point-of-care solutions that serve the ambulatory, acute/sub acute, emergency and home health market segments.

iPatientCare EHR 2014 (2.0) has received 2014 Edition Ambulatory Complete EHR certification by ICSA Labs, an Office of the National Coordinator-Authorized Certification Body (ONC-ACB), in accordance with the applicable eligible professional certification criteria adopted by the Secretary of Health and Human Services (HHS).

Full certification details can be found at **ONC Certified Health IT Product List.**

The ONC 2014 Edition criteria support both Stage 1 and 2 Meaningful Use measures required to qualify eligible providers and hospitals for funding under the American Recovery and Reinvestment Act (ARRA).

The company has won numerous awards for its EHR technology and is recognized as an innovator in the field, being a pioneer to offer an EHR technology on a handheld device, an innovative First Responder technology to the US Army for its Theatre Medical Information System, the first to offer a Cloud based EHR product. iPatientCare is recognized as one of the best EHR and Integrated PM System for small and medium sized physicians' offices; has been awarded most

number of industry Awards; and has been recognized as a preferred/MU partner by numerous Regional Extension Centers (REC), hospitals/health systems, and academies.
