

# SERVICES FOR EDUCATION

## HOW WE HELP OUR CLIENTS

We have had extensive experience providing IT hardware, consulting and recycling services throughout our quarter century existence. We have collaborated with some of the most prestigious institutions throughout the country to help provide:

- Network infrastructure redesign
- Security testing
- Threat management installation
- IT hardware recycling / drive sanitation

## NETWORKING SOLUTIONS

Working in an Education setting can be complicated, and we get that. When it comes to network redesigns and system upgrades, we understand the challenges. Whether you're replacing malfunctioning equipment or preparing for complex data center upgrades; we have the technical professionals and resources to ensure you get the best IT equipment and post-sale expertise. We have helped [install and configure systems](#) for some institutions large and small.

## SECURITY / CYBER-ATTACKS

Keeping student and employee records safe, secure, and undisturbed is a high priority for many educational settings. Schools have access to many personal health and academic records that could put their student's identities and lively hood at risk if ever exploited. We've found a way to evaluate your network so that you can proactively defend against potential [cyber-attacks](#), such as:

- Assessments of wired and wireless networks, software applications, data storage devices, servers, and hardware appliances
- Penetration testing
- Vulnerability assessments
- Reduce costs and downtime associated with cyber-attacks, malware, and viruses

## IT HARDWARE RECYCLING / DRIVE SANITATION

Schools are constantly upgrading IT hardware and networking equipment to keep up with the latest advances in technology. When that occurs, there needs to be a safe and secure way to recycle end-of-life IT hardware and networking gear. We actually [pay our clients for their old equipment](#), provide a credit or (if in working condition) remarket the equipment and pay on consignment. Prior to resale or decommissioning, we sanitize data devices according to the Department of Defense, conform to [R2 Standards](#), and are [Registered as a New York State Recycler](#).
