

SERVICES FOR FINANCE FIRMS

HOW WE HELP OUR CLIENTS

We have had extensive experience providing IT hardware, consulting and recycling services throughout our quarter century existence. We have collaborated with some of the most dynamic financial firms in the country.

- Network infrastructure redesign
- Security testing
- Threat management installation
- IT hardware recycling / drive sanitation

NETWORKING SOLUTIONS

The IT infrastructure for financial firms can be one of the most complex and secured, other than the Federal Government. We understand the need for secure options when upgrading the technology that is integral to your business. The financial industry is one that is ever changing and is as dynamic as your business needs. We redesign system upgrades and understand the challenges. Whether you're replacing malfunctioning equipment or preparing for complex data center upgrades; we have the technical professionals and resources to ensure you get the best IT equipment and post-sale expertise. We have helped [install and configure systems](#) for financial firms large and small.

SECURITY / CYBER-ATTACKS

Keeping your customers records safe, secure, and undisturbed is a high priority for many financial firms. The finance industry has access to banking accounts, social security numbers, and other personal information that could be susceptible to identity theft if not properly safe guarded. Not properly testing your environment could lead to infiltration and can leave your customers at risk if ever exploited. We've found a way to evaluate your network so that you can proactively defend against potential [cyber-attacks](#), such as:

- Assessments of wired and wireless networks, software applications, data storage devices, servers, and hardware appliances
- Penetration testing
- Vulnerability assessments
- Reduce costs and downtime associated with cyber-attacks, malware, and viruses

IT HARDWARE RECYCLING / DRIVE SANITATION

When financial institutions upgrade their IT hardware to keep up with the latest advances in technology, ensuring that data is completely sanitized from devices is a necessary step in the upgrade process. You need a safe and secure way to recycle end-of-life IT hardware and networking gear. We actually [pay our clients for their old equipment](#), provide a credit or (if in working condition) remarket the equipment and pay on consignment. Prior to resale or decommissioning, we sanitize data devices according to the Department of Defense, conform to [R2 Standards](#), and are [Registered as a New York State Recycler](#).
