

SERVICES FOR GOVERNMENT & MILITARY

HOW WE HELP OUR CLIENTS

We have had extensive experience providing IT hardware, consulting and recycling services throughout our quarter century existence. We have helped many branches of the United States Government & Military with:

- Network infrastructure redesign
- Security testing
- Threat management installation
- IT hardware recycling / drive sanitation

NETWORK SOLUTIONS

The United States Government & Military create tremendous amounts of digital information that takes the shape of planning documents, governing materials, meeting notes, contracts, reports, service member information, and daily office activities such as email. We redesign fluid system upgrades that improve business agility and understand the major challenges faced. Whether you're replacing malfunctioning equipment or preparing for complex data center upgrades/document management solutions; we have the technical professionals and resources to ensure you get the best IT support to help [install and configure systems quickly and efficiently](#).

SECURITY / CYBER-ATTACKS

Keeping all digital and confidential records safe, secure, and undisturbed is a high priority for our the United States Government & Military. As top-secret and sensitive materials are created, the need to keep that data confidential is extremely important to the protection of our country . Properly testing your environment should be done on a regular basis. We've found a way to evaluate your network so that you can proactively defend against potential [cyber-attacks](#), such as:

- Assessments of wired and wireless networks, software applications, data storage devices, servers, and hardware appliances
- Penetration testing
- Vulnerability assessments
- Reduce costs and downtime associated with cyber-attacks, malware, and viruses

IT HARDWARE RECYCLING / DRIVE SANITATION

As IT hardware is upgraded in order to keep up with the latest advances in technology, ensuring that intellectual and confidential data developed by our Government & Military is completely sanitized from devices is a necessary step in the upgrade process. You need a safe and secure way to recycle end-of-life IT hardware and networking gear. We actually [pay our clients for their old equipment](#), provide a credit or (if in working condition) remarket the equipment and pay on consignment. Prior to resale or decommissioning, we sanitize data devices according to the Department of Defense, conform to [R2 Standards](#), and are [Registered as a New York State Recycler](#).
