

SERVICES FOR HEALTH CARE

HOW WE HELP OUR CLIENTS

We have had extensive experience providing IT hardware, consulting and recycling services throughout our quarter century existence. We have helped many certified healthcare providers with:

- Network infrastructure redesign
- Security testing
- Threat management installation
- IT hardware recycling / drive sanitation

NETWORK SOLUTIONS & ELECTRONIC RECORD MANAGEMENT

The IT infrastructure for healthcare providers is one of the most complex when it comes to compliance requirements and healthcare regulations. The demand for IT professionals with healthcare industry support experience is driven most by these compliance requirements. We redesign system upgrades and understand the challenges when it comes to initiatives in electronic record management. Whether you're replacing malfunctioning equipment or preparing for complex data center upgrades/document management solutions; we have the technical professionals and resources to ensure you get the best IT support. We have helped [install and configure systems](#) for health care providers large and small.

SECURITY / CYBER-ATTACKS

Keeping your patients records safe, secure, and undisturbed is a high priority for many healthcare providers. As a healthcare provider, you have access to health history, social security numbers, and other personal information that could fall into the wrong hands. Properly testing your environment should be done on a regular basis. We've found a way to evaluate your network so that you can proactively defend against potential [cyber-attacks](#), such as:

- Assessments of wired and wireless networks, software applications, data storage devices, servers, and hardware appliances
- Penetration testing
- Vulnerability assessments
- Reduce costs and downtime associated with cyber-attacks, malware, and viruses

IT HARDWARE RECYCLING / DRIVE SANITATION

When healthcare providers upgrade their IT hardware to keep up with the latest advances in technology, ensuring that data is completely sanitized from devices is a necessary step in the upgrade process. You need a safe and secure way to recycle end-of-life IT hardware and networking gear. We actually [pay our clients for their old equipment](#), provide a credit or (if in working condition) remarket the equipment and pay on consignment. Prior to resale or decommissioning, we sanitize data devices according to the Department of Defense, conform to [R2 Standards](#), and are [Registered as a New York State Recycler](#).
