HWA INTERNATIONAL, INC CELEBRATES ITS 40TH ANNIVERSARY

Providing reliable, cost-effective software to the trust industry

Memphis, Tennessee, June 2, 2014 – HWA International, Inc. marks a significant milestone in its existence by celebrating its 40th year in business. President, Harry Sullivan explains, “HWA International was founded on the basis of providing quality software products partnered with exceptional customer service. We thank the many clients who have supported HWA through the years and look forward to extending our relationships in the future.”

Founded in 1974, HWA International originally provided consulting and custom programming to businesses. Currently, HWA offers three customizable software systems for foundations, banks, trust companies, family offices and other financial institutions. TrustNet (a transaction-based product), TRUSTprocessor (a general ledger-based product), and TAMS (a smaller version of TrustNet) are licensable solutions for a full range of fiduciary operations. HWA is known for developing software which is feature-rich, reliable, flexible and fully customizable.

“HWA is a unique company due to the longevity of its employees. Even counting our outstanding recent hires, our average staff tenure is more than 11 years, with many team members over 20 years,” says Vice President Donna Manley. “With that level of experience, we can understand what our clients need and build programs to fulfill their expectations.”

Throughout the period of its existence, HWA International, Inc. has earned a reputation as a developer that offers high-quality software and exceptional customer service for trust clients. The company’s products are designed to simplify many standard routine procedures as well as help users optimize their time and efforts for solving more complicated and sophisticated tasks. Manley adds, “We offer a strong core system that is robust enough to accommodate most clients. For those that have unique needs, we will customize the software for them. We give our clients the option to be different than their competitors which gives them the option to be better.”
