For The First Time, Autotask Users Can Eliminate Rolling AR With ConnectBooster!
ConnectBooster and Autotask partner to roll out beta program offering more than $1,000 off!

Fargo, ND: ConnectBooster is bringing to Autotask users its marquee MSP payment software, designed to eliminate rolling accounts receivable and collections hassles. To date, ConnectBooster has only been available to other PSA users.

Managed Service Providers, who use Autotask and sign up for the beta program by June 30, 2014, will enjoy a savings of more than $1,000. The cost would be $100 to get setup instead of the normal $599, and $50 each month July through December to cover merchant fees, instead of the normal $149 per month.

The ConnectBooster MSP payment online automation software is fully integrated with Autotask and your accounting software in order to allow you to:

- Receive your money automatically from clients via ACH or a credit card at the time you send the invoice. No more chasing down what you are owed.
- Get paid online any time by your clients.
- Schedule "set it and forget it" auto payments for recurring contracts.
- Forever eliminate your AR backlog.
- Allow your clients to log in and see all past invoices and payments, among other benefits.

"After helping PSA customers collectively gather hundreds of thousands in rolling AR, we're proud to roll out our software to Autotask users," said president Ryan Goodman, a partner with ConnectBooster. "It's exciting to see Autotask is welcoming us with open arms."

About ConnectBooster: ConnectBooster is the only automated MSP payment processing solution that bridges the gap between your Autotask PSA software, your client's bank account or credit card, and your QuickBooks or Microsoft Dynamics GP accounting software.
