

Solutions Brief  
[Intel® Developer Zone](#)

## Enabled by Intel® Atom™ Tablets for Android\*

The developers at Grofsoft have made TripView Sydney, a travel information app, available on Intel® Atom™ tablets for Android\*. Now, mobile device users can access pertinent, updated schedules for trains, buses and ferries, all right from their lightweight, portable screens. As an Intel® Software Partner, Grofsoft has the advantage of a broad portfolio of technical and business resources through the Intel® Developer Zone.

Travelers, tourists and commuters can capitalize on real-time transportation information as they journey through the beautiful city of Sydney. Users can view timetables, maps and advisories so that they arrive at their destination on time. Once downloaded, the app saves the information so users can access it offline. Bus, train and ferry timetables frequently update, even providing platform numbers. Delay notifications and interactive maps keep travelers informed and routes can be saved in the app for further use.

# TripView Sydney Makes Sydney Easy to Navigate for Android\* Tablet Users

Mobile devices take the worry out of getting around Sydney. TripView Sydney gives tourists and commuters a reliable resource with this recent optimization for Android\* tablets. Staying informed helps travelers relax and enjoy the journey.

## Downloadable, Real-time Timetables

Detailed bus, train and ferry timetables are easily accessed and saved so that current information can be viewed offline. Additional timetable features include summary and full view windows, platform numbers and indicators and next service notifications. An alarm option gives travellers a reminder before their service is due to arrive or depart.

## Service and Delay Information

Accurate information about service interruption or delays is accessible via Wi-Fi or Internet. Travelers can plan accordingly ahead of time if there are disruptions and revise their plans with interactive mapping.

## Multi-modal and Interactive Mapping

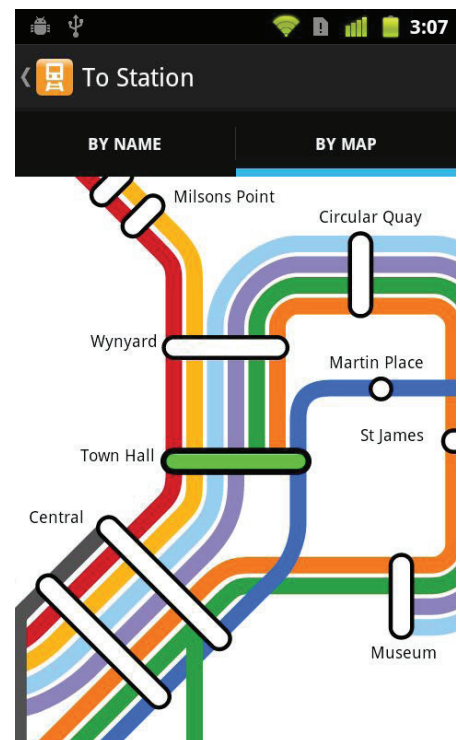

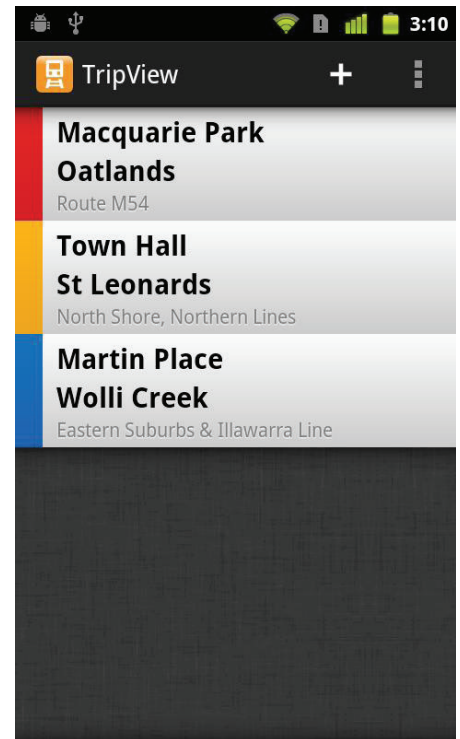

Travelers can devise their routes by train, bus, car and ferry right on their tablets. Simply looking up stops or ports and clicking on them create multi-segment itineraries. Making adjustments with alternate routes is easy and trips can be saved for future use. The app takes the guesswork out of planning and navigating any excursion.

## User-Friendly Interface

Crisp graphics and an intuitive display make the app a valuable tool when exploring Sydney. The sensitive touch mechanism and clear maps and tables are easy to read and manipulate.

## Mobility and Portability

Users have the advantage of accessing real-time schedule information right from their powerful, lightweight mobile devices. Easy portability and hours of functionality make Android\* tablets effective traveling tools for experiencing Sydney.

## TripView Sydney on Tablets for Android\* Powered by Intel®

Now that the TripView app is available on Android\* tablets powered by Intel® Atom™ processors, the adventure of exploring Sydney just got easier. The high-performance platform provides a solid level of functionality so that travelers can confidently navigate to their destination.
