How Timestream Works

Timestream desktop app

A visual way to learn. You will thoroughly learn your case as you organize the events, details and supporting documents on the interactive timeline.

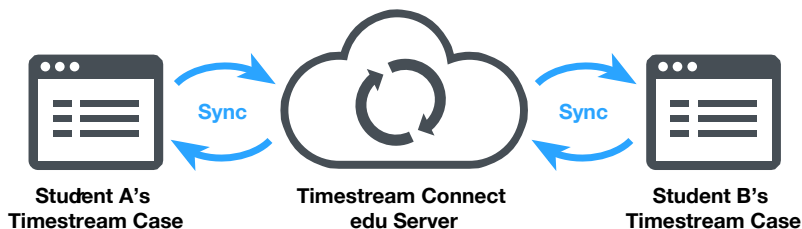

- Drag and drop supporting files into the case.
- Tag and filter to see how events are related in a case.
- Time zone support for international collaboration.
- Export timeline data into presentations and reports.
- No installation, Mac and Windows compatible.
- Never lose work with automatic file save.

Timestream Connect edu server

Collaboration is key. Our cloud server will make working on individual and group projects more efficient and productive.

- Manage cases directly from *Timestream*.
- Work offline from anywhere.
- Sync information over the edu cloud server.
- Easy setup with one-time server registration.

Timestream Capture mobile app

Got an iPhone? You can gather field data and import it directly into your *Timestream* timeline.

- Record audio interviews and video.
- Take high-quality photographs.
- Location data is recorded at point of capture.
- Import scanned documents.
- Add notes to captured files.
- Files are stored separately from personal data.
- Wirelessly import files directly into your *Timestream* case timeline.
