

# PostEverywhere® Network

100,000+ Carriers • 1,000,000+ Trucks

PostEverywhere® is an online load posting solution that helps shippers and freight brokers post truckloads and LTL simultaneously to over 50 load boards across North America, all from a single user interface. The loads are posted throughout the PostEverywhere® network, reaching 100,000 carriers, in the time it takes to manually post to just one load board. PostEverywhere® makes posting loads an efficient and productive task which improves load-coverage responsiveness.

As a result of using PostEverywhere®, shippers and brokers increase their load visibility in the market, successfully grow their carrier base and move more loads - faster.

## POST® EVERYWHERE

Move more loads - faster
