RAPID PROJECT MAKER, Ver. 2.0

## Design, Configure, Deploy

- Design, Configure, and Deploy AMX Systems in Less than an Hour
- Now Featuring Dual Room Configuration: Automate Two Rooms with a Single Enova DVX

### Create the Perfect Meeting in Under an Hour

You need to create an environment to hold **The Perfect Meeting** – where your presentation material, video, audio and room control technology work together seamlessly to make your meeting a success.

But why do so many meetings fail? It's frequently because of difficulties with the technology that manages the crucial presentation material in your conference rooms and classrooms. The system is too complex, it's unreliable, or it's a nightmare to set up and configure in the first place.

Rapid Project Maker (RPM) is an application designed to eliminate your meeting room technology problems. AMX leveraged decades of experience to bring you a software system that guides you through the process of setting up all of your conference room or classroom technology quickly, easily and reliably - so that everything works perfectly from the start.

For complete details and to get started with RPM today, visit the RPM Portal at [www.amxrpm.com](http://www.amxrpm.com).

WITHOUT RPM Automating a Conference Room is:	WITH RPM Automating a Conference Room is:
<b>Difficult.</b> Requires extensive programming skills.	<b>Simple.</b> No programming or sophisticated technical knowledge required.
<b>Time Consuming.</b> Takes days or weeks to program a system.	<b>Fast.</b> Set up a complete system in an hour or less that works perfectly from the start.
<b>Expensive.</b> Programming costs can consume a budget.	<b>Affordable.</b> RPM is free and eliminates expensive programming and integration costs.
<b>Unreliable.</b> Complex programming can lead to complex & unreliable installations, resulting in failed meetings.	<b>Rock-Solid.</b> RPM system designs and code are tested and backed by AMX, resulting in the Perfect Meeting.
<b>Inconsistent.</b> Custom programming is difficult to replicate.	<b>Easy to Duplicate.</b> Projects are saved to the AMX Cloud and can be deployed to any number of similar rooms.

### FEATURES

NEW

**Now Supporting Dual Room Configuration** – Save up to 15% of a project budget by using a single DVX to automate two rooms with RPM.

NEW

**Supports Enzo Content Sharing Platform** – Launch Enzo apps and web pages directly from a Touch Panel or Keypad

**Cloud-Based Tool** – Design, configure and manage systems over the web – no software required.

**No Programming Required** – Dramatically simplifies configuration of an AMX control system.

**Configure Systems in Less Than an Hour** – With no programming required, complete multiple installations with greater consistency, reliability and efficiency.
