Screen Mirroring from Laptops/Smartphones/Tablets

NEW

Integrated Web Conferencing

Enzo is a content sharing platform purposely designed for meeting rooms, classrooms and other collaboration spaces, providing instant access to a wide variety of content and web conferencing services.

KEY FEATURES

NEW
- **Screen Mirroring using MirrorOp[1]** – Through Enzo, meeting attendees can share content being displayed on guest laptops (Windows/Mac OS X), smartphones and tablets

NEW
- **Web Conferencing** – Without the need for a PC or other expensive video conferencing solutions, Enzo enables affordable web conferencing just by adding an AMX Sereno Video Conferencing Camera (see pages 4-5 for more details)

NEW
- **Configure Using Rapid Project Maker (RPM)** – Available in RPM 2.0, custom Enzo sessions initiated on a touch panel can be enabled via just a click

- **"Instant-On" File and Web Browsing** – Access content stored in the cloud or USB thumb drive files within seconds of entering the room

- **IT Friendly** – Avoids OS updates, viruses and other PC-related maintenance hassles and costs

- **End of session data purge** – Prevents unintended disclosure of confidential information

- **PoE, Pass-Through Ethernet and Small Form Factor** – Easy to Install practically anywhere

[1]MirrorOp is the industry leading technology for wireless mobile content sharing.

Enzo Empowers Meeting Room
