

## High Res Sports Camera Synchs with Smartphone

ACTION cameras just got a lot smarter thanks to a new high definition camera released by China wholesale company Chinavasion.

The company has just launched a [1080p sports camera](#) which it says is can not only handling the elements but also talking to almost any Android or iOS device over WiFi.

With a fully working WiFi transmitter capable of sending 802.11 b, g and n signals, the action camera can communicate with Android and iOS devices.

Users can expect a high level of performance from the camera with the unit shooting at 30 frames per second - 60 frames per second with resolution ranging from 1280x720 pixels - 1920x1080 or still images 3 megapixels - 10 megapixels catching footage at 140 degrees.

Chinavasion PR Manager Rose Li says the company is excited to be launching a product she describes as being on the leading edge of technology.

"This camera can't be beat," says Li. "The performance, durability and connectivity of this camera makes it possible to use this camera anywhere from the highest peak to 40 meters underwater."

Li says with a 1050mAh, 3.7V li-ion battery it will keep the camera running for 1.5 hours with the camera able to read and write to flash memory cards up to 32GB.

"Chinavasion has always been able to offer sports cameras capable of performing as well as anything that cost three times the price," says Li.

With companies like Chinavasion offering [sports action cameras](#) Li says it has never been easier or safer to buy sports cameras.

"With 360,000 registered customers from every corner of the world Chinavasion has earned a reputation as a trusted source of tech," says Li.

With a range of action cameras, outdoor devices and wearable gadgets [Chinavasion](#) is the only destination for the latest gadgets online.
