

SOFTELEGANCE — DYNAMIC SOFTWARE BUSINESS SOLUTIONS

SoftElegance is a software development company that provides quality business software to improve business system efficiency, client interaction, and employee communications.

SoftElegance committed to innovations designed to provide clients with significant gains in the quality of their systems, competitive advantages in the cost of developing systems and the most importantly, developing client satisfaction.

Founded in 1993, SoftElegance is a software development outsourcing company that specializes in affordable custom software development and software solutions for business. SaaS systems, sophisticated web portals, applications, and business processes automation are offered to the customers who are on the FORTUNE 500 list and SMB companies. With offices in London, Houston, and Kiev and clients from the U.S. and the E.U. SoftElegance assists customers in developing software for internal automation and providing software solutions worldwide.

SoftElegance's attention is focused on each of the major components of a successful project: quality communication, careful planning, skilled development, quality control, testing, and on time delivery.

SoftElegance today assists business practices that enable companies to operate more efficiently and produce more value through the use of up-to-date technologies in their software.

SoftElegance provides high-quality work for every project for it is based on efficient internal process management procedures, quality assurance policies, and total project monitoring and control - this gives satisfaction to the clients and endorses their reputation.

SoftElegance offers software development services across diverse industries and brings a range of solutions and products that enhance clients company's performance and competitiveness with a grounded understanding of particular business inquiries facing present-day challenges.

IF YOU CAN DREAM IT, WE CAN BUILD IT

SoftElegance's clients can efficiently work with onsite consultants, supervise remote workers, track project status, communicate in real time, and collaborate using appropriate tools and technologies.

SERVICES

SoftElegance provides customized software development, project management, consulting, and dedicated services to fit clients' needs and budgets. It is offered software consulting, development, and maintenance services on the outsourcing business model, where clients benefit from SoftElegance's up-to-date methodologies, technical skill pool, processes and quality infrastructure.

SoftElegance's dedicated development teams operate on customer's schedule. All infrastructure and personnel are at client's disposal for a fixed monthly rate. Clients retain all intellectual property rights, complete control over project objectives and benefit from developers trained in the most up-to-date technology, without the heavy expense of hiring a full-time employee.

SoftElegance keeps up a philosophy of clients comfort, high quality of deliverables, flexible business approaches, apparent project management techniques, focusing on cutting edge tools and technologies, and dedication to the project.

SoftElegance's custom software development focuses on up-to-date tools and technologies to develop up-to-date software systems, and flexible business processes, giving clients control over project management.

CONVERT CURRENT SOFTWARE OR CREATE NEW APPLICATIONS
TO BE OFFERED AS CLOUD-COMPUTING OR SAAS PRODUCTS

SoftElegance's streamlined processes ensure that the project is completed on time and efficiently. Software application is 100% tailored to the customer's business goals - from increasing internal or employee efficiency to improving existing services for customers.

SOFTELEGANCE

DYNAMIC SOFTWARE BUSINESS SOLUTIONS

Building upon the concept
of iterations we work with clients to:

- Outline the solution;
- Define the solution architecture;
- Develop prototypes and review them with the users;
- Design the framework of the solution;
- Build the solution;
- Validate the solution against business requirements;
- Rolling out the solution across the organization;
- Continuous support of the solution.

Over hundred large-scale projects
for the industries:

OIL AND GAS;
DRILLING;
MANUFACTURING;
ENGINEERING;
RETAIL BUSINESS;
HR MANAGEMENT.

We continuously work on processes improvement.
